## VISION

- To develop globally competent Mechanical Engineers with innovation and research culture leading to entrepreneurship and successful in advanced fields of Engineering and Technology towards a societal change.

## MISSION

- To impart quality education to the students and enhance their skills to make them successful Mechanical Engineers.
- To maintain vital (state-of-the-art) facilities to provide its students and faculty with opportunities to create, interpret, apply and disseminate knowledge.
- To develop linkages with reputed R&D organizations and educational institutions in India for excellence in teaching, research and consultancy practices.

## PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

- PEO1: Graduates of the program will have a successful career of mechanical engineering by imparting Mechanical Engineering concepts and practical knowledge.
- PEO2: Graduates of the program will pursue higher education and research in the field of mechanical engineering.
- PEO3: Graduates of the program will exhibit Scientific and Engineering expertise and perform as a Professional Entrepreneur.

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

## PROGRAM SPECIFIC OUTCOMES (PSOs)

- PSO 1: Ability to apply the acquired Mechanical Engineering knowledge for the development of composite materials for societal application.
- PSO 2: Ability to apply the acquired Mechanical Engineering knowledge for the development of automobile systems.

## PROGRAMME OUTCOMES (POs)

- PO-1. Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems.
- PO-2. Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- PO-3. Design / Development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- PO- 4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- PO- 5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- PO- 6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- PO- 7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- PO- 8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

- PO- 9. Individual and team work: Function effectively as an individual and as a member or leader in diverse teams, and in multidisciplinary settings.
- PO-10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- PO-11. Project management and finance: Demonstrate knowledge and understanding of the engineering management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- PO- 12. Life-long learning: Recognize the need for and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change.

## I SEMESTER

| SUBJECT CODE  | TITLE OF THE SUBJECT   | L    | T | P | C | QP         |   |   |   |    |    |    |      |   |
|---|--|------|---|---|---|------------|---|---|---|----|----|----|------|---|
| BBSBS 1010  | ENGINEERING MATHEMATICS-I  | 3    | 1 | 0 | 4 | A          |   |   |   |    |    |    |      |   |
| Pre –Requisite: Fundamental of calculus   |  |      |   |   |   |            |   |   |   |    |    |    |      |   |
| <b>Course Educational Objectives</b>  |  |      |   |   |   |            |   |   |   |    |    |    |      |   |
| CEO1  | To find critical points, and use them to locate maxima and minima.   |      |   |   |   |            |   |   |   |    |    |    |      |   |
| CEO2  | To provide the standard methods for solving differential equations.  |      |   |   |   |            |   |   |   |    |    |    |      |   |
| CEO3  | To study Fourier series and to express a function in Fourier series.   |      |   |   |   |            |   |   |   |    |    |    |      |   |
| CEO4  | To use matrices, determinants and techniques for solving systems of linear equations in the different areas of Linear Algebra. |      |   |   |   |            |   |   |   |    |    |    |      |   |
| <b>Course Outcomes: Upon successful completion of this course, students should be able to:</b>  |  |      |   |   |   |            |   |   |   |    |    |    |      |   |
| CO1   | Implement the engineering problems using the concept of Partial differentiation and series and to understand its application.  |      |   |   |   |            |   |   |   |    |    |    |      |   |
| CO2   | Solve the initial value and boundary value problem of ODE related to Electrical circuit.                                       |      |   |   |   |            |   |   |   |    |    |    |      |   |
| CO3   | Execute the technique of Fourier series for applying in Engineering applications.  |      |   |   |   |            |   |   |   |    |    |    |      |   |
| CO4   | Find the Eigen value and vector of a matrix by using properties of linear algebra  |      |   |   |   |            |   |   |   |    |    |    |      |   |
| CO-PO & PSO Mapping   |  |      |   |   |   |            |   |   |   |    |    |    |      |   |
| COs   | PROGRAMME OUTCOMES   |      |   |   |   |            |   |   |   |    |    |    | PSOs |   |
|   | 1  | 2    | 3 | 4 | 5 | 6          | 7 | 8 | 9 | 10 | 11 | 12 | 1    | 2 |
| CO1   | 1  | 2    |   |   |   |            |   |   |   |    |    |    |      |   |
| CO2   | 2  | 3    |   |   |   |            |   |   |   |    |    |    |      |   |
| CO3   | 1  | 3    |   |   |   |            |   |   |   |    |    |    |      |   |
| CO4   | 2  | 3    |   |   |   |            |   |   |   |    |    |    |      |   |
| Avg.  | 1.5  | 2.75 |   |   |   |            |   |   |   |    |    |    |      |   |
| SYLLABUS  |  |      |   |   |   |            |   |   |   |    |    |    |      |   |
| UNIT-I  | MULTI-VARIABLE CALCULUS  |      |   |   |   | (13 Hours) |   |   |   |    |    |    |      |   |
| Partial differentiation, Euler's theorem, Total derivative, Taylor's theorem for function of two variable (without proof), Maxima and Minima for function of two variables, Differentiation under integral sign (Leibnitz rule).  |  |      |   |   |   |            |   |   |   |    |    |    |      |   |
| UNIT- II  | DIFFERENTIAL EQUATIONS-I   |      |   |   |   | (12 Hours) |   |   |   |    |    |    |      |   |
| Ordinary differential Equations: First order and first degree differential equations and their method of solving, Application to Electrical circuits and heat conduction.   |  |      |   |   |   |            |   |   |   |    |    |    |      |   |
| DIFFERENTIAL EQUATIONS-II   |  |      |   |   |   |            |   |   |   |    |    |    |      |   |
| Linear differential equations of higher order and their different methods of solutions (operator methods). Second order linear differential equations and their solutions: Euler Cauchy equation, solution by undermined coefficient method and variation of parameters. Simple application to electrical circuits. |  |      |   |   |   |            |   |   |   |    |    |    |      |   |
| UNIT -III   | FOURIER SERIES   |      |   |   |   | (10 Hours) |   |   |   |    |    |    |      |   |
| Fourier series, Fourier expansion of functions of arbitrary period, Even and odd functions, Half Range Expansion.   |  |      |   |   |   |            |   |   |   |    |    |    |      |   |

| SUBJECT CODE | TITLE OF THE SUBJECT  | L | T | P | C | QP |
|--------------|-----------------------|---|---|---|---|----|
| BBSBS1022    | ENGINEERING CHEMISTRY | 3 | 0 | 0 | 3 | A  |

Pre -Requisite: Chemistry

## Course Educational Objectives

|      |   |
|------|---|
| CEO1 | To impart the knowledge of application of chemical sciences in the field of engineering |
| CEO2 | To focus on microscopic chemistry in terms of atomic and molecular levels.              |
| CEO3 | The course aims at elucidating principles of applied chemistry in water treatment.      |
| CEO4 | To give detailed account about the reactivity of metals w.r.t prevention of corrosion.  |
| CEO5 | To enlighten the students with the applications of polymers.                            |

## Course Outcomes: Upon successful completion of this course, students should be able to:

|     |  |
|-----|--|
| CO1 | Analyze microscopic chemistry in terms of atomic and molecular orbital and Explain the ranges of the electromagnetic spectrum by electronic transition |
| CO2 | Identify water treatment techniques for domestic and industrial purposes   |
| CO3 | Compare types of corrosion, and it's control measures.   |
| CO4 | Understand various types of polymers, their preparation along with applications  |

### CO-PO & PSO Mapping

### SYLLABUS

UNIT-1 ATOMIC AND MOLECULAR STRUCTURE (13 Hours)  
Schrodinger's wave equation(no derivation), Significance of wave functions, Particle in a box, Application for conjugated molecule, Molecular Orbital theory and Energy level diagram for Diatomic molecules, Spectroscopic techniques and applications: Electronics spectroscopy, Vibrational and rotational spectroscopy of diatomic molecules.

UNIT-2 WATER CHEMISTRY (13 Hours)  
Types of Hardness, Determination of Hardness by EDTA method, Treatment of water for Domestic use, Water softening processes Lime-soda process, Ion Exchange method, Boiler feed water, Scale and Sludge, Caustic embrittlement, Carbonate and phosphate conditioning, Colloidal conditioning, Calgon conditioning.

UNIT-3 CORROSION (10Hours)  
Thermodynamic functions: Entropy, Free energy, Relation between E.M.F and free energy, The Nernst's equation and application, Definition of corrosion, Types of corrosion: Dry corrosion and wet corrosion, Galvanic corrosion, Concentration cell corrosion, Factors influencing corrosion, Corrosion control: Cathodic protection (Sacrificial anodic protection and Impressed current cathodic protection), Inhibitors, Protective coatings: Galvanization and Tinning.

## GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

### UNIT -4 POLYMER CHEMISTRY

(12 Hours)

Introduction, polymer, Classification of polymers, Plastics: Thermosetting and thermo plastic, PVC, PE, PS, PMMA, PTFE, Bakelite, Nylon-6,6, Nylon-6, Fiber reinforced plastic.

\*ADD-ON COURSES: Conducting Polymer (Polyaniline, Polyacetylene), Bio-Degradable and Non-Bio Degradable polymer, Nano composite.

Teaching Methods: Chalk & Board/ PPT/Video Lectures

Text Books: 1. Engineering chemistry by Jain & Jain, Dhanpat Rai publishing company (p) Ltd

#### Reference Books:

1. A Text Book of Engineering Chemistry by S.S. Dara, S Chand Publishers.
2. A Text Book of Engineering Chemistry by Sashi Chawla, Dhanpat Rai Publishing house.
3. Text Book of Engineering Chemistry, 2<sup>nd</sup> edition, by R. Gopalan, D. Venkayaya & Sulochana Nagarajan, Vikas Publishing House Pvt. Ltd.
4. B. Tech Chemistry- I and II by P. K. Kar, S. Dash, B. Mishra kalyani publishers.
5. Physical Chemistry By P.W Atkins
6. Engineering Chemistry( NPTEL Web Book) by B . L Tembe, Kamaluddin and M.S. Krishna
7. Fundamentals of Molecular spectroscopy By C . N Banwell
8. University chemistry by B.H. Mahan

## GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

Semiconductor Devices:- Classification of material, Energy band diagram, properties of semiconductors, Types of semiconductors, Semiconductor diode (no bias, forward, reverse), temperature effects, diode equivalent circuit, zener diode, LED, Half wave rectifier, full wave rectifier, clippers, clampers.

### UNIT-2

Bipolar Junction Transistors (BJTs):- Introduction, transistor operation, Simplified structure and physical operation of n-p-n and p-n-p transistors in the active region, Common-Base configuration, Common-emitter configuration, Common-collector configuration Current-voltage characteristics of BJT, BJT as an amplifier and as a switch.

Field Effect Transistors (FETs):- Introduction, construction and characteristics of JFETs, transfer characteristics, D-MOSFET, E-MOSFET.

### UNIT-3

Communication Systems: -Analog and digital signals, block diagram of basic communication system, need for modulation, methods of modulation, AM/FM transmitters & receivers (Block diagram description only)

Electronic Instruments:- Basic principle of Oscilloscope, Function of the sweep generator, Block diagrams of oscilloscope, Measurement of frequency and phase by Lissajous method, Application of oscilloscope for measurement of voltage, period and frequency, Block diagram of standard signal generator, AF sine and square wave generator, and Function generator.

### UNIT-4

Digital Systems and Binary Numbers:-Digital systems, Binary numbers, number system conversion, octal & hexa decimal number, 1's & 2's complements, signed binary numbers, binary codes, binary logic.

Logic Gates and Boolean Algebra:- The inverter, The AND, OR, NAND NOR, Exclusive-OR and Exclusive-NOR gate, Boolean operations and expressions, Laws and Rules of Boolean algebra, DeMorgan's theorem, Boolean analysis of logic circuits, Standard forms of Boolean expressions, Boolean expression and truth table Combinational Logic and Their Functions: Basic combinational logic circuits, Implementation of combinational logic, The universal properties of NAND and NOR gates, Basic adders

Teaching Methods: Chalk & Board/ PPT/Video Lectures

### Text Books:

1. Electronic Devices (Seventh Edition), Thomas L. Floyd, Pearson Education, 482 FIE, Patparganj, Delhi – 110 092 (Selected Portions).
2. Digital Fundamentals (Eighth Edition), Thomas L. Floyd and R.P. Jain, Pearson Education, 482 FIE, Patparganj, Delhi – 110 092.
3. Electronic Instrumentation, H.S. Kalsi, Tata McGraw-Hill Publishing Company Limited, New Delhi.

### Reference Books:

1. Microelectronic Circuits (Fifth Edition), Adel S. Sedra and Kenneth C. Smith, Oxford University Press, YMCA Library Building Jai Singh Road, New Delhi – 110 001.

| SYLLABUS   |            |
|--|------------|
| UNIT-1   | (15 Hours) |
| DC Circuits:<br>Introduction to electrical terminology, Ohm's Law, Equivalent Resistance, series-parallel circuits, star-delta transformation, types of elements, ideal and practical voltage & current sources; Kirchoff's Law, Mesh and Nodal Analysis.<br>Network theorems:<br>Superposition Theorem, Thevenin theorem, Maximum power transfer theorem excited by independent sources, Transients in RL & RC series circuits.   |            |
| UNIT-2   | (13 Hours) |
| Single phase & Three phase Ac circuits:<br>AC Fundamentals: RMS & Average value, form and peak factors, Complex algebra, concepts of reactance, impedance and their representation, AC through pure R, L, C, series RL, series RC, series RLC circuit, Concept of power & power factor; expression of power in complex notation.<br>Three-phase AC circuits:<br>Comparison between 1-ph & 3-ph AC circuit, Star & Delta connection, relation between line and phase quantities, Measurement of 3-phase power using 2-wattmeter method.<br>Magnetic circuits:<br>Magnetic flux, Magnetic flux density, Magnetic fields intensity, Relation between B & H, B-H curve, Analogy between Electric and Magnetic circuit, Leakage flux. |            |
| UNIT-3   | (12 Hours) |
| DC Machines:<br>Introduction, working principle of DC Generator, Construction, Types, EMF equation, working principle of DC Motor Back e.m.f, Application of DC machines.<br>AC Machines:<br>Introduction, Principle of operation of AC machines, Transformers, Construction, EMF equation, Turn ratio, Ideal transformer on no load with phasor diagram, 3-phase Induction motor principle of operation, Rotating magnetic field, Types of rotors, Synchronous speed and slip, Introduction to 1-phase Induction motor, 1-phase motors types, applications of 3-phase and 1-phase motors, AC generator and motors, Principle of operation, types of rotors, Synchronous motor operating principle.                              |            |
| UNIT-4   | (10 Hours) |
| Measuring Instruments:<br>Introduction, Classification of instruments, construction and working principles of PMMC and moving iron type Instruments.<br>Introduction to Power System & Domestic Wiring:<br>General layout of electrical power system and functions of its elements, Generation of electricity (Hydro, Thermal and Nuclear power plant), standard transmission and distribution voltages, Service main, Meter board, Fuse, MCB, Earthing (pipe & plate earthing), House wiring, Electric shock & precautions.   |            |
| Teaching Methods: Chalk& Board/ PPT  |            |

## SYLLABUS

UNIT -1 Importance of English for Communication in the 21st Century (9 Hours)

- 1.1 Role of English in enhancing employability and entrepreneurial skills
- 1.2 The Nature and Scope of Communication
- 1.3 Objectives of Communication: Information, advice, suggestion, order, motivation, persuasion, warning, negotiation, decision-making, etc. through English Language skills, i.e., LSRW skills
- 1.4 The process of communication and factors that influence communication: Sender, receiver, channel, code, topic, message, context, feedback, noise, filters and barriers (steps such as Ideation, Encoding, Transmission, Decoding, etc. need to be dealt with); Audience and purpose
- 1.5 Types of Communication: General and Professional Communication; Formal and Informal Communication; Verbal and Non-verbal communication; Intrapersonal and Interpersonal communication; Written communication and Spoken communication.

UNIT -2. English Vocabulary, Grammar & Usage (8 Hours)

- 2.1 Synonyms and Antonyms
- 2.2 Words often confused
- 2.3 Technical terms and one word substitutes
- 2.4 Idioms and Phrasal Verbs
- 2.5 Identify common errors in English.
- 2.6 Communicative use of the Passive Voice
- 2.7 Difference between American, British and Indian English (Vocabulary based) 1

UNIT- 3. Introduction to Corporate Communication (10 Hours)

- 3.1 Seven C's communication
- 3.2. Ten C's of Non-communication.
- 3.3 Corporate Communication – Direction of Communication: Downward Communication, Upward Communication, Horizontal/Lateral Communication, Diagonal Communication
- 3.4 Communication challenges in today's work place: Advances in technology; culturally diverse workforce; Team-based organizational Settings; how to overcome these challenges
- 3.5 Information and Communication Technology (ICT) and the corporate world, Power point presentation using multimedia; Internet and Intranet; Fax; Teleconferencing; Videoconferencing;
- 3.6 Corporate/Business etiquette: Good listening skills, proper dressing and grooming; proper handshake, mobile etiquette, table manners

UNIT- 4 Soft skills Development. (9 Hours)

- 4. 1 Importance of soft skills in personal and professional life
- 4.2 Are we hardwired for success?
- 4.3 Importance of developing a positive attitude
- 4.4 Leadership skills.
- 4.5 Teamsmanship.
- 4.6. Lateral thinking
- 4.7 Emotional Intelligence.

Teaching Methods: Chalk& Board/ PPT/Video Lectures

## Text Books:

1. *An Introduction to Professional English and Soft Skills* by B. K. Das et al., Cambridge University Press.
2. *Communicative English for Engineers and Professionals* by Nitin Bhatnagar and Mamta Bhatnagar. Published by DK/Pearson.
3. *Practical English Usage*. Michael Swan, OUP, 1995.

## Reference Books:

1. *Technical Communication , Principle and Practice* by Meenakshi Raman & Sangeeta Sharma, Oxford University Press
2. *Business Communication Today* by Bovee, Courtland L., Thill, John V. Prentice Hall.
3. *The Ace of Soft Skills: Attitude, Communication and Etiquette for Success* by Gopalaswamy Ramesh and Mahadevan Ramesh. Pearson.
4. *Oxford Guide to English Grammar* by John Easthood. Oxford University Press.
5. *365 Ways to Change Your World* by Norman Vincent Peale by Orient Paperbacks.

| LAB CODE   | NAME OF THE LAB  | L | T | P | C | QP |
|--|--|---|---|---|---|----|
| BBSBS1121  | ENGINEERING PHYSICS LABORATORY   | 0 | 0 | 2 | 1 |    |
| <b>Course Educational Objectives</b>   |  |   |   |   |   |    |
| CEO1   | Students will understand the basic principles of physics and their mathematical description.                                     |   |   |   |   |    |
| CEO2   | Students will be able to use the laws of physics and calculus to solve problems  |   |   |   |   |    |
| CEO3   | Students will be able to work together in collaborative groups to perform experiments, gather data and reach conclusions.        |   |   |   |   |    |
| <b>Course Outcomes: Upon successful completion of this course, students should be able to:</b> |  |   |   |   |   |    |
| CO1  | Understand the uses of various Basic Instruments for different Physical measurements.  |   |   |   |   |    |
| CO2  | Apply the Physical Laws and verify those using standard Experiments.   |   |   |   |   |    |
| CO3  | Organize experiments to determine different Physical quantities and analyze those for different application to Physical Systems. |   |   |   |   |    |
| CO4  | Evaluate the magnitudes of Physical quantities systematically through  |   |   |   |   |    |

## SYLLABUS

List of Experiments:

1. Determination of total hardness of water by using EDTA.
2. Determination of amount of NaOH and Na<sub>2</sub>CO<sub>3</sub> present in mixture of two.
3. Standardization of KMnO<sub>4</sub> using sodium oxalate.
4. Determination of ferrous ion in Mohr's salt by standardized KMnO<sub>4</sub>.
5. Determination of % of dissolved oxygen in given water sample.
6. Estimation of available chlorine in bleaching powder solution.
7. Determination of rate constant of acid catalyst Hydrolysis reaction.
8. Preparation of aspirin
9. Estimation of calcium in limestone.
10. Estimation of Zinc in brass.
11. To determine the strength of HCl and acetic acid from the mixture of acid by strong alkali (NaOH) by Conductrometry
12. Preparation of nanoparticle.
13. Determination of partition coefficient of iodine in benzene and water.
14. Preparation and determination of pH of buffer solution.
15. To determine the molecular weight of polymer by viscosity measurement.

## SYLLABUS

List of Experiments:

EXPERIMENTS: 1 Familiarization of electronic components and devices (Testing of semiconductor diodes and transistors using digital multi meter)

EXPERIMENTS: 2 Study and use of Oscilloscope, signal generator to view waveforms and measure amplitude and frequency of a given waveform.

EXPERIMENTS: 3 V-I characteristics of semiconductor diode

EXPERIMENTS: 4 Studies on half-wave and full-wave rectifier circuits without and with capacitor filter; recording of the waveforms and measurement of average and rms values of the rectifier output.

EXPERIMENTS: 5 Studies on clipper circuit.

EXPERIMENTS: 6 Studies on clamper circuit.

EXPERIMENTS: 7 V-I characteristic of an n-p-n or p-n-p transistor, DC biasing the transistor in common-emitter configuration and determination of its operating point (i.e., various voltages and currents).

EXPERIMENTS: 8 MOSFET I-V characteristics

EXPERIMENTS: 9 Studies on Logic gates (Truth table verification of various gates).

EXPERIMENTS: 10 Studies and experiments using ADDER CIRCUITS ICs

| LAB CODE | NAME OF THE LAB                         | L | T | P | C | QP |

## SYLLABUS

### List of Experiments:

1. Study of different electrical equipment's( transformer, single phase motors)
2. Power factor improvement using capacitor for fluorescent lamp.
3. Verification of Superposition and Thevenin's theorem
4. Measurement of reactive power by using single watt-meter method
5. 3phase Power measurement by using two wattmeter methods.
6. Calculation of current, voltage and power in series R-L-C circuit excited by single-phase AC supply and calculation of power factor.
7. Determination of open circuit characteristics (OCC) of DC shunt generator
8. Starting and speed control of a dc shunt motor by (a) field flux control method, and (b) armature voltage control method.
9. V-I characteristics of incandescent lamps and time-fusing current characteristics of a fuse.
10. Connection and testing of a single-phase energy meter.

| <ul style="list-style-type: none"> <li>• WAP to input radius of a circle and Find the area, perimeter of it.</li> <li>• WAP to input two numbers and swap them without using intermediate variable.</li> <li>• WAP to input marks for physics, mathematic, chemistry, English by considering each subject have maximum 100 marks. Find and display their percentage.</li> <li>• Write a program to accept Fahrenheit and calculate its equivalent Celsius.</li> <li>• Write a program to input principle amount, no. of terms and rate of interest. Find simple interest.</li> <li>• WAP to input three unequal numbers and find the greatest using conditional operator.</li> <li>• Write a program to input a float value and display its integer part &amp; fractional part separately.</li> </ul> |   |      |   |     |   |   |   |   |   |    |    |    |      |   |
| Lab 4:  |   |      |   |     |   |   |   |   |   |    |    |    |      |   |
| <ul style="list-style-type: none"> <li>• Write a program to find greatest among three unequal numbers using else...if ladder.</li> <li>• Write a program to find the real roots of a quadratic equation when three coefficient values are given.</li> <li>• Write a program to input a lower case alphabet and test whether it is vowel or consonant using switch..case</li> <li>• Write a program to find the greatest among three numbers using switch..case.</li> </ul>  |   |      |   |     |   |   |   |   |   |    |    |    |      |   |
| Lab 5:  |   |      |   |     |   |   |   |   |   |    |    |    |      |   |
| <ul style="list-style-type: none"> <li>• Write a program to find the factorial of a given positive integer.</li> </ul>  |   |      |   |     |   |   |   |   |   |    |    |    |      |   |

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A Grade and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

- Write a program to find the sum of individual digits of a positive integer.
- Write a program to generate Fibonacci series of N numbers.
- Write a program to find the greatest common divider of two positive numbers given.
- Write a program to accept a positive integer and test it for palindrome or not.

Lab 6:

- Write a program to calculate the following sum:

$$\text{Sum} = 1 - \frac{x^2}{2!} + \frac{x^4}{4!} - \frac{x^6}{6!} + \frac{x^8}{8!} - \frac{x^{10}}{10!}$$

- Write a C program to display all the prime numbers exist between 1 to n, where n is the value supplied by the user.
- Write a program to generate the following pyramid.

```
      1
     1 2 3
    1 2 3 4 5
   1 2 3 4 5 6 7
```

- Write a program to generate the following pyramid.

```
      A
     A  B
    A  B  C
   A  B  C  D
  A  B  C  D  E
```

Lab 7:

- Write a program to accept 10 numbers in to an array and sort it in ascending order
- Write a program to accept 10 integers in to an array and find largest and smallest integers present in them.
- Write a program to input elements 4x4 matrix. Find the principal diagonal of them.
- Write a program to input values into two matrices A(3x4), B(4x3). Perform matrix multiplication and display the resultant matrix.

Lab 8:

- Write a program to accept a string and test whether it is palindrome or not using string handling functions
- Write a C program which contains three UDF's namely add(), subtract() and multiply(). Each function accepts two integers as their arguments and calculate and return the results
- Write a program to find greatest common divisor of two integers using recursive and non recursive functions.
- Write a program to accept 10 elements into an integer array. Find the largest element present using recursive function.

Lab 9:

- Write a program to create user defined function called swap having two integer pointers as its arguments and it has no return value. Call this function using call-by-address
- Write a program to input a set of n numbers into an integer array. Create an user defined function that accepts the array using pointer and finds number of prime numbers exist in the array
- Write a program to create an user defined function which accepts a string using a character pointer and performs the operations:
- Finds the length of the string ,Reverse the string.

## GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

### Lab 10:

- Write a program to create an user defined function which accepts a matrix using a pointer and returns the address of largest element present in it
- Write a program to store 'n integers using dynamic memory allocation. Find the average value of the integers using a user defined function.
- Write a program to create a structure called complex to represent a complex number. Perform addition of two complex numbers using an UDF

### Lab 11:

- Write a program to create a structure for employee code, name and salary. Store five employee details using structure array and display only employee names whose salary is greater than 25000
- Write a program to input 11 cricket players details using a structure array having members player name, team name, batting average. Create a function which will display the player names whose batting average  $\geq 7$ .

### Lab 12:

- Write a program to create a structure for product having members like product code, product name, price and quantity. Create a structure pointer to allocate memory for five products using dynamic memory allocation. Store the product details and display.
- Write a program to create a structure student having members like rollno, name and percentage. Store five student details using structure array. Create an user defined function that accepts the student details using a structure pointer and displays the count how many first division students present.

| Avg.  | 1.5   |          |          | 2.5      |          |    |   |   |   |    |    |    |      |   |
| Unit 1  |   |          |          |          |          |    |   |   |   |    |    |    |      |   |
| Introduction: Introduction to Standards for Engineering Drawing practice, Line work and Dimensioning. [1 – Sheets]  |   |          |          |          |          |    |   |   |   |    |    |    |      |   |
| Co ordinate system and reference planes: Definitions of HP, VP, RPP & LPP. Selection of drawing size and scale. Representation of point and line. [1 – Sheets]  |   |          |          |          |          |    |   |   |   |    |    |    |      |   |
| Unit 2  |   |          |          |          |          |    |   |   |   |    |    |    |      |   |
| Orthographic Projections : Introduction, Definitions Planes of projection, reference line, Projections of points in all the four quadrants, Projections of straight lines (located in First quadrant/first angle only), True and apparent lengths, True and apparent inclinations to reference planes. [1 – Sheets] |   |          |          |          |          |    |   |   |   |    |    |    |      |   |
| Orthographic Projections of Plane Surfaces (First Angle Projection Only): Introduction, Definitions–projections of plane surfaces–triangle, square, rectangle, hexagon and circle. [1 – Sheets]   |   |          |          |          |          |    |   |   |   |    |    |    |      |   |
| Projections of Solids (First Angle Projection Only) : Introduction, Definitions – Projections of right regular tetrahedron, hexahedron (cube), prisms, cylinders and cones in different positions. [1 sheet]  |   |          |          |          |          |    |   |   |   |    |    |    |      |   |
| Unit 3 [2 – Sheets]   |   |          |          |          |          |    |   |   |   |    |    |    |      |   |
| Sections and Development of Lateral Surfaces of Solids : Introduction, Section planes, Sections, Section views, Sectional views, Apparent shapes and True shapes of Sections of right regular prisms, pyramids, cylinders and cones resting with base on HP.  |   |          |          |          |          |    |   |   |   |    |    |    |      |   |
| Unit 4  |   |          |          |          |          |    |   |   |   |    |    |    |      |   |
| Isometric Projection (Using Isometric Scale Only) : Introduction, Isometric scale, Isometric projection of tetrahedron, cones and spheres. [1 – Sheets]   |   |          |          |          |          |    |   |   |   |    |    |    |      |   |

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
 Accredited by NAAC with a CGPA of 3.28/4 at A Grade and Accredited by NBA

| SYLLABUS   |   |      |   |   |     |   |      |   |   |    |    |     |      |   |
| UNIT - I <span style="float: right;">(07 Hours)</span>   |   |      |   |   |     |   |      |   |   |    |    |     |      |   |
| INTRODUCTION OF PARTIAL DIFFERENTIAL EQUATIONS:<br>Formation of Partial differential equations, Linear partial differential equation of first order: Lagrange's linear differential equation, Non-Linear partial differential equation of first order by Charpit's method.   |   |      |   |   |     |   |      |   |   |    |    |     |      |   |
| UNIT-II <span style="float: right;">(20 Hours)</span>  |   |      |   |   |     |   |      |   |   |    |    |     |      |   |
| Laplace Transforms: Definition, existence of Laplace Transforms, Properties of Laplace Transforms, Evaluation of integrals by Laplace Transforms, Inverse transforms, convolution theorem, transforms of unit step function, unit impulse function, periodic function. Simple application to ordinary differential equations by Laplace Transform method, Definition of Fourier Integral and Fourier transform |   |      |   |   |     |   |      |   |   |    |    |     |      |   |
| UNIT - III <span style="float: right;">(10 Hours)</span>   |   |      |   |   |     |   |      |   |   |    |    |     |      |   |
| Vector differential calculus: vector and scalar functions and fields, Derivatives, Curves, tangents and arc Length, gradient, divergence, curl and their simple application  |   |      |   |   |     |   |      |   |   |    |    |     |      |   |
| UNIT – IV <span style="float: right;">(13 Hours)</span>  |   |      |   |   |     |   |      |   |   |    |    |     |      |   |

## GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

Vector integral calculus: Definition and evaluation of double integration and triple integration, Evaluation of line integral, Surface integral and volume integral and their applications, Transformations theorems- Green's Theorem in plane , Stoke's Theorem, Gauss Divergence Theorem and their applications.

Teaching Methods: Chalk& Board/ PPT/Video Lectures

Prescribed Books

1. Advanced Engineering Mathematics by E. Kreyszig, John Willey & Sons Inc. 10th Edition

References:

1. Higher Engineering Mathematics by B. V. Ramana , Mc Graw Hill Education.
2. Higher Engineering Mathematics by BS Grewal : Khanna Publishers, New Delhi.
3. Advanced Engineering mathematics by H. K. Dass.

|   |            |
|---|------------|
| UNIT: 03  | (10 Hour)  |
| Electromagnetic theory and wave Review of grad, divergence and curl, Gauss divergence theorem and Stoke's theorem (no derivations), fundamental laws of electrostatics, magneto-statics and electromagnetism, displacement current and conduction current, Maxwell's equations. Electromagnetic wave and its characteristics, electromagnetic wave equation for free space and in charge free conducting medium, electromagnetic energy, Poynting vector and Poynting theorem.  |            |
| UNIT: 04  | (12 Hours) |
| Quantum Mechanics Introduction to dual nature: Black body radiation, photoelectric effect, Compton effect (qualitative idea only), de-Broglie's hypothesis, Heisenberg's uncertainty principle and its application to non-existence of electron inside the nucleus and ground state energy of one dimensional harmonic oscillator, Basic postulates of Quantum Mechanics, Wave function and its characteristics, probability density, normalization, eigen values, eigen functions and expectation values, Schrödinger's equation (time dependent and time independent). Application of Schrödinger equation to one dimensional potential well, potential step and potential barrier (qualitative ideas). |            |

| Rectilinear motion: uniform velocity and uniformly accelerated motion Newton second<br>law D'Alembert's principle and its applications work and energy equation Impulse and<br>Momentum Impact of elastic bodies.  |   |      |   |   |   |            |   |   |   |    |    |    |      |   |

## GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

Teaching Methods: Chalk& Board/ PPT/ Guest Lecture

Text Books:

1. Timoshenko, and Young, "Engineering Mechanics", Tata Mc Graw Hill Book
2. S. S. Bhavikatti, "Engineering Mechanics", New Age International

Ref. Books:

5. Dr. Bansal.R.K, & Sanjay Bansal, "A Text book of Engineering Mechanics", Lakshmi publications.
6. A.K.Tayal, "Engineering Mechanics Statics And Dynamics", Umesh Publications
7. Rajasekaran.S, & Sankarasubramanian.G, "Engineering Mechanics", Vikas Publishing House Pvt Ltd, 2011
8. Engineering Mechanics, (3ed edition) by Statics and Dynamics K.Vijaya Kumar Reddy and J Suresh Kumar, BS Publications.

| SUBJECT CODE  | TITLE OF THE SUBJECT  | L    | T | P | C | QP |   |   |   |    |    |    |      |   |
|---|---|------|---|---|---|----|---|---|---|----|----|----|------|---|
| BBS1032   | BASICS OF THERMODYNAMICS  | 3    | 0 | 0 | 3 | A  |   |   |   |    |    |    |      |   |
| Pre –Requisite: Physics, Chemistry and Mathematics  |   |      |   |   |   |    |   |   |   |    |    |    |      |   |
| <b>Course Educational Objectives</b>  |   |      |   |   |   |    |   |   |   |    |    |    |      |   |
| CEO1  | Learn to classify the fundamentals of thermodynamics like pressure, temperature etc.  |      |   |   |   |    |   |   |   |    |    |    |      |   |
| CEO2  | Apply principle and law of thermodynamics to analysis of different systems  |      |   |   |   |    |   |   |   |    |    |    |      |   |
| CEO3  | Become aware of relevance of environmental and social issues on the analysis process of systems.  |      |   |   |   |    |   |   |   |    |    |    |      |   |
| CEO4  | To understand the basics of properties of pure substance like steam and its conditions and Application of Thermodynamics in engineering practices |      |   |   |   |    |   |   |   |    |    |    |      |   |
| <b>Course Outcomes: Upon successful completion of this course, students should be able to:</b>  |   |      |   |   |   |    |   |   |   |    |    |    |      |   |
| CO1   | Explain the basic concepts of system, control volume, thermodynamic properties, thermodynamic equilibrium, temperature, work and heat energy.     |      |   |   |   |    |   |   |   |    |    |    |      |   |
| CO2   | Apply the laws of thermodynamics to refrigerators, heat engines, heat pumps compressors and nozzles etc.  |      |   |   |   |    |   |   |   |    |    |    |      |   |
| CO3   | Interpret and apply the concept of entropy to thermodynamic systems   |      |   |   |   |    |   |   |   |    |    |    |      |   |
| CO4   | Evaluate properties of pure substances, gases and their mixtures and to derive and apply to thermodynamic problems.                               |      |   |   |   |    |   |   |   |    |    |    |      |   |
| CO-PO & PSO Mapping   |   |      |   |   |   |    |   |   |   |    |    |    |      |   |
| COs   | PROGRAMME OUTCOMES  |      |   |   |   |    |   |   |   |    |    |    | PSOs |   |

| CO4   | 3   | 3    |   |   |   |    |   |   |   |    |    |    |      |   |
| Avg.  | 2.5   | 2.75 |   |   |   |    |   |   |   |    |    |    |      |   |
| SYLLABUS  |   |      |   |   |   |    |   |   |   |    |    |    |      |   |
| UNIT 1 <span style="float: right;">(15 Hours)</span><br>Basic concepts & definition, scope of thermodynamics. Macroscopic & microscopic approach. Definition of fixed mass (closed) system & control volume (open) system, isolated system. Thermodynamic properties (extensive & intensive), state & its representation on a property diagram, process and its representation, cyclic process Characteristics of properties (point & path function), reversible & irreversible process, Quasistatic Process. Thermodynamic equilibrium. Pressure, Types of pressure, Zeroth law of thermodynamics & temperature scales, calibration of thermometers. Ideal gasses & their P V T relation. Energy transfer; Work transfer(definition & calculation), different modes of work Displacement work for various process, Free expansion work, Heat transfer; modes of heat transfer, basic laws in conduction, convection & radiation. |   |      |   |   |   |    |   |   |   |    |    |    |      |   |
| UNIT 2 <span style="float: right;">(13 Hours)</span><br>First law of thermodynamics, formal statement (using cyclic process) first law for processes of fixed masses (closed system) Introduction of internal energy, enthalpy as thermodynamic properties Definition of sp.heats ( $C_p$ & $C_v$ ) and their use in calculation of internal energy & enthalpy with emphasis on ideal gas. Application of first law to control volume (Steady Flow); nozzle, diffuser, compressor, turbine, throttling device.  |   |      |   |   |   |    |   |   |   |    |    |    |      |   |
| UNIT 3 <span style="float: right;">(12 Hours)</span><br>Second law of thermodynamics, Kelvin Planck & Clausius statements, Carnot cycle.  |   |      |   |   |   |    |   |   |   |    |    |    |      |   |

## GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

communication system, need for modulation, methods of modulation, AM/FM transmitters & receivers (Block diagram description only)

Electronic Instruments:- Basic principle of Oscilloscope, Function of the sweep generator, Block diagrams of oscilloscope, Measurement of frequency and phase by Lissajous method, Application of oscilloscope for measurement of voltage, period and frequency, Block diagram of standard signal generator, AF sine and square wave generator, and Function generator.

### UNIT-4

Digital Systems and Binary Numbers:- Digital systems, Binary numbers, number system conversion, octal & hexa decimal number, 1's & 2's compliments, signed binary numbers, binary codes, binary logic.

Logic Gates and Boolean Algebra:- The inverter, The AND, OR, NAND NOR, Exclusive-OR and Exclusive-NOR gate, Boolean operations and expressions, Laws and Rules of Boolean algebra, DeMorgan's theorem, Boolean analysis of logic circuits, Standard forms of Boolean expressions, Boolean expression and truth table Combinational Logic and Their Functions: Basic combinational logic circuits, Implementation of combinational logic, The universal properties of NAND and NOR gates, Basic adders

Teaching Methods: Chalk & Board/ PPT/ Video Lectures

### Text Books:

1. Electronic Devices (Seventh Edition), Thomas L. Floyd, Pearson Education, 482 FIE, Patparganj, Delhi – 110 092 (Selected Portions).
2. Digital Fundamentals (Eighth Edition), Thomas L. Floyd and R.P. Jain, Pearson Education, 482 FIE, Patparganj, Delhi – 110 092.
3. Electronic Instrumentation, H.S. Kalsi, Tata McGraw-Hill Publishing Company Limited, New Delhi.

### Reference Books:

1. Microelectronic Circuits (Fifth Edition), Adel S. Sedra and Kenneth C. Smith, Oxford University Press, YMCA Library Building Jai Singh Road, New Delhi – 110 001.
2. Electronic Devices and Circuit Theory (Ninth Edition), Robert L. Boylestad and Louis Nashelsky, Pearson Education, 482 FIE, Patparganj, Delhi – 110 092.
3. Electronics Principles (7th Edition), Albert Malvano and David J. Bates, Tata McGraw-Hill Publishing Company Limited, New Delhi.

| DC Circuits:<br>Introduction to electrical terminology, Ohm's Law, Equivalent Resistance, series-parallel circuits, star-delta transformation, types of elements, ideal and practical voltage & current sources; Kirchhoff's Law, Mesh and Nodal Analysis.<br>Network theorems:<br>Superposition Theorem, Thevenin theorem, Maximum power transfer theorem excited by independent sources, Transients in RL & RC series circuits.  |  |     |   |   |   |    |   |   |   |    |    |    |      |   |
| UNIT-2 (13 Hours)  |  |     |   |   |   |    |   |   |   |    |    |    |      |   |
| Single phase & Three phase Ac circuits:<br>AC Fundamentals: RMS & Average value, form and peak factors, Complex algebra, concepts of reactance, impedance and their representation, AC through pure R, L, C, series RL, series RC, series RLC circuit, Concept of power & power factor; expression of power in complex notation.<br>Three-phase AC circuits:<br>Comparison between 1-ph & 3-ph AC circuit, Star & Delta connection, relation between line and phase quantities, Measurement of 3-phase power using 2-wattmeter method.<br>Magnetic circuits: |  |     |   |   |   |    |   |   |   |    |    |    |      |   |

## GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

Magnetic flux, Magnetic flux density, Magnetic fields intensity, Relation between B & H, B-H curve, Analogy between Electric and Magnetic circuit, Leakage flux.

UNIT-3 (12 Hours)

DC Machines:

Introduction, working principle of DC Generator, Construction, Types, EMF equation, working principle of DC Motor Back e.m.f, Application of DC machines.

AC Machines:

Introduction, Principle of operation of AC machines, Transformers, Construction, EMF equation, Turn ratio, Ideal transformer on no load with phasor diagram, 3-phase Induction motor principle of operation, Rotating magnetic field, Types of rotors, Synchronous speed and slip, Introduction to 1-phase Induction motor, 1-phase motors types, applications of 3-phase and 1-phase motors, AC generator and motors, Principle of operation, types of rotors, Synchronous motor operating principle.

UNIT-4 (10 Hours)

Measuring Instruments:

Introduction, Classification of instruments, construction and working principles of PMMC and moving iron type Instruments.

Introduction to Power System & Domestic Wiring:

General layout of electrical power system and functions of its elements, Generation of electricity (Hydro, Thermal and Nuclear power plant), standard transmission and distribution voltages, Service main, Meter board, Fuse, MCB, Earthing (pipe & plate earthing), House wiring, Electric shock & precautions.

Teaching Methods: Chalk& Board/ PPT/Video Lectures Expert/MOOCs

Text Books:

1. V. Del Toro, "Principles of Electrical Engineering" Prentice Hall International.
2. P.V. Prasad, S.Sivanagaraju, R.Prasad Basic Electrical and Electronics Engineering; CENGAGE Learning.
3. I.J. Nagarath, " Basic Electrical Engineering" Tata McGraw Hill
4. D.E. Fitzgerald & A. Grabel Higginbotham, " Basic Electrical Engineering Mc- Graw Hill.

Reference Books:

1. Edward Hughes, " Electrical Technology" Longman
2. T.K. Nagsarkar & M.S. Sukhija, "Basic Electrical Engineering" Oxford University Press.
3. H. Cotton, " Advanced Electrical Technology" Wheeler Publishing
4. W.H. Hayt & J.E. Kennely, "Engineering Circuit Analysis" Mc Graw Hill.
5. Theory and Problems of Basic Electrical Engineering by D.P.Kothari & I.J. Nagrath PHI.
6. Fundamentals of Electrical Engineering and Electronics by B. L. Theraja, S. Chand & Company Ltd, Reprint Edition 2013.

| CO4  | 3   | 3   | 1    | 1    |   |    |   |   |   |    |    |    |      |   |
| AVG.   | 2.75  | 2.5 | 2.25 | 0.75 |   |    |   |   |   |    |    |    |      |   |
| SYLLABUS   |   |     |      |      |   |    |   |   |   |    |    |    |      |   |
| Unit I <span style="float: right;">[12 hours]</span>   |   |     |      |      |   |    |   |   |   |    |    |    |      |   |
| Basic concepts: Data abstraction, Algorithm specification, Memory Representation of 1D and 2D Array.<br>Stack: Introduction to stack, basic operations and implementation of stack using arrays<br>Queue: Introduction to linear queue, basic operations and implementation of linear queue using arrays, circular queue, basic circular queue operations & Representation of Double ended Queue.<br>Applications on stack – Recursion, infix to postfix conversion, Evaluation of postfix |   |     |      |      |   |    |   |   |   |    |    |    |      |   |
| Unit II <span style="float: right;">[12 hours]</span>  |   |     |      |      |   |    |   |   |   |    |    |    |      |   |
| Searching: Linear search and Binary search using linear array<br>Sorting: Bubble sort, Insertion sort, Selection sort, Quick sort, Bucket Sort using linear array.   |   |     |      |      |   |    |   |   |   |    |    |    |      |   |

## GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

Linked Lists: Basic operations of singly, doubly and circular linked lists, implementation of stack and queue using singly linked list

Unit III [12 hours]

Trees: Introduction, Terminology, Binary Trees, Representation of Binary Trees using arrays and linked lists, Binary tree traversals, Creation of binary tree from in-order & pre-order sequences - Creation of binary tree from in-order & post-order  
Binary Search Trees: definition, basic operations of BST (Searching, Insertion and deletion)

Introduction to AVL trees, Height of an AVL Tree, Balancing AVL tree by rotations after insertions and deletions of a data node.

Unit IV [12 hours]

Heaps: Introduction to binary heaps, definition of a Max-heap, Min-heap, creating Max-Heap, Applications: Heap sort, Priority queue

Graphs: Definitions, Graph representation - Adjacency matrix, Incidence Matrix, adjacency lists, Graph Traversals (BFS & DFS), Single source shortest path algorithm (Dijkstra's Algorithm) Topological Sorting

Hashing: Hashing Functions, Open hashing (chaining), closed hashing (Open addressing – linear probing, quadratic probing, double hashing), rehashing

Teaching Methods: Chalk& Board/ PPT/Video Lectures

Text Books:

1. Gilberg and Forouzan: "Data Structure- A Pseudo code approach with C" by Thomson publication
2. "Data structure in C" by Tanenbaum, PHI publication / Pearson publication.
3. Pai: "Data Structures & Algorithms; Concepts, Techniques & Algorithms" Tata McGraw Hill.
4. "Fundamental of Data Structure" ( Schaums Series) Tata-McGraw-Hill.

Reference Books:

1. "Fundamentals of data structure in C" Horowitz, Sahani & Freed, Computer Science Press.
2. Data Structures, Algorithms And Applications In C++ 2nd Edition (Sartaj Sahni)
3. Data Structure Through C++ Edition-1st (Yashwant Kanitkar)

| BBSES1142 | BASIC ELECTRICAL ENGINEERING LABORATORY | 0 | 0 | 2 | 1 |    |

## Course Educational Objectives

CEO1 | To know the basic concepts on different types of circuits.

## Course Outcomes: Upon successful completion of this course, students should be able to:

CO1 | Illustrate the transformers and single phase motors constructional features

CO2 | Analyse various electrical quantities with combination of loads

CO3 | Examine the characteristics of AC and DC machines

CO4 | Distinguish the methods of speed control of DC motors

## CO-PO & PSO Mapping

## SYLLABUS

### List of Experiments:

1. Study of different electrical equipment's( transformer, single phase motors)
2. Power factor improvement using capacitor for fluorescent lamp.
3. Verification of Superposition and Thevenin's theorem
4. Measurement of reactive power by using single watt-meter method
5. 3phase Power measurement by using two wattmeter methods.
6. Calculation of current, voltage and power in series R-L-C circuit excited by single-phase AC supply and calculation of power factor.
7. Determination of open circuit characteristics (OCC) of DC shunt generator
8. Starting and speed control of a dc shunt motor by (a) field flux control method, and (b) armature voltage control method.
9. V-I characteristics of incandescent lamps and time-fusing current characteristics of a fuse.
10. Connection and testing of a single-phase energy meter.

| SYLLABUS  |  |     |   |     |      |   |   |   |   |    |    |    |      |   |    |
| Lab1: introduction to OOPs (C++ features), cin, cout, object, class, Simple programs.   |  |     |   |     |      |   |   |   |   |    |    |    |      |   |    |
| Lab2: Access Specifiers, inline, private, public, arrays of objects, programs on them.  |  |     |   |     |      |   |   |   |   |    |    |    |      |   |    |
| Lab3: Experiment No.1   |  |     |   |     |      |   |   |   |   |    |    |    |      |   |    |
| 1) Write a C++ program to create a class called student to store your rollno, name, age. Create an array of object to input 5 students data and then display where age>=20. |  |     |   |     |      |   |   |   |   |    |    |    |      |   |    |
| Write a C++ program to create a class having methods for operations insertion, deletion and display to perform operations on 1D array of elements.                          |  |     |   |     |      |   |   |   |   |    |    |    |      |   |    |
| Lab4: Experiment No.2   |  |     |   |     |      |   |   |   |   |    |    |    |      |   |    |
| Write a C++ program to create a class having methods: insertion, multiply and display for performing multiplication on a matrix of elements.                                |  |     |   |     |      |   |   |   |   |    |    |    |      |   |    |
| Lab5: Experiment No.3   |  |     |   |     |      |   |   |   |   |    |    |    |      |   |    |
| Write a program using C++ to create a stack using class and perform:  |  |     |   |     |      |   |   |   |   |    |    |    |      |   |    |

## GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

(i) push operation (ii) pop operation (iii) display operation

Lab6: Experiment No.4

Write a C++ program that uses Stack operations to converting an infix expression into equivalent postfix expression.

Lab7: Experiment No.5

Write a C++ program to create a linear queue and perform the following operations:

(i) insertion ii) deletion and iii) Traversal

Lab8: Experiment No.6

Write C++ programs that use both recursive and non-recursive functions to perform the linear & binary search operation for a Key value in a given list of integers.

Lab9: Experiment No.7

Write a C++ menu driven program to implement bubble sort, selection sort and insertion sort for a given list of integers in increasing order

Lab10: Experiment No.8

Write a C++ program to implement quick sort to a given list of integers to sort in ascending order.

Lab11: Experiment No.9

Write a C++ program that uses functions to perform the following operations on linear linked list: i) Creation ii) Insertion iii) Deletion iv) Traversal

Lab12: Experiment No.10

Write a C++ program that uses functions to perform the following operations on Double linked list: i) Creation ii) Insertion iii) Deletion iv) Traversal.

| Avg.   | 2  | 2.75     |          |          |          |          |   |   |   |    |    |            |      |   |   |
| <b>SYLLABUS</b>  |  |          |          |          |          |          |   |   |   |    |    |            |      |   |   |
| UNIT:1   |  |          |          |          |          |          |   |   |   |    |    | [12 Hours] |      |   |   |
| Complex Analysis:  |  |          |          |          |          |          |   |   |   |    |    |            |      |   |   |

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A Grade and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

|   |
|---|
| Analytic function, Cauchy-Riemann equations, Harmonic Function, Complex integration: Line integral, Cauchy's integral theorem, Cauchy's integral formula.   |
| UNIT:2 [8 Hours]<br>Taylor's series, Laurent's series, Singularities and zeros, Residues, Cauchy Residue theorem, Evaluation of real integrals.   |
| UNIT:3 [10 Hours]<br>Numerical methods:<br>Errors, Solving of algebraic and transcendental equations by using fixed point iteration and Newton-Raphson's method. : Newton divided differnterpolation,Lagrange interpolation ,Newton's forward and backward interpolation.Numerical Differentiation,Numerical integration:The trapezoidal rule, The simpson's rules, Ordinary differential equation: Modified Euler's method, Runge-kutta methods. |
| UNIT:4 [18 Hours]<br>PROBABILITY:<br>Random variables, Probability distributions, Mean and variance of distribution, Binomial, Poisson and uniform distributions, Normal distribution, Random sampling, Estimation of Parameters (maximum likely hood method),Confidence intervals, Testing of hypothesis ,Acceptance sampling ,Regression and correlation analysis, fitting of straight line by least square method.                             |
| Teaching Methods: Chalk& Board  |
| Text Books:<br>1. Advanced Engineering Mathematics by E. Kreyszig, Tenth Edition, Willey<br>2. Numerical Methods by Jain and Iyengar.   |
| Ref. Books:<br>1. Higher Engineering Mathematics by BS Grewal : Khanna Publishers, New Delhi.<br>2. Higher Engineering Mathematics by B.V.Ramana, McGraw Hills Education<br>3. Numerical Methods by Dutta and Jena.   |

| 1. Mechanics of Materials by Beer and Johnston, Tata McGraw Hill.   |                    |      |   |   |   |   |   |   |   |    |    |            |      |     |
| 2. Mechanics of Materials by R.C. Hibbeler, Pearson Education   |                    |      |   |   |   |   |   |   |   |    |    |            |      |     |
| 3. Mechanics of Materials by William F. Riley, Leroy D. Sturges and Don H. Morris, Wiley Student Edition  |                    |      |   |   |   |   |   |   |   |    |    |            |      |     |

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

| SUBJECT CODE   | TITLE OF THE SUBJECT   | L | T | P | C | QP |
|--|--|---|---|---|---|----|
| BMEPC3020  | FLUID MECHANICS & HYDRAULICS<br>MACHINES   | 3 | 0 | 0 | 3 | A  |
| Pre -Requisite: Physics, Thermodynamics, Mechanics, Mathematics                                |  |   |   |   |   |    |
| <b>Course Educational Objectives</b>   |  |   |   |   |   |    |
| CEO1   | To know the concept of fluid and its properties, manometer, hydrostatic forces acting on different surfaces and also problem solving techniques. |   |   |   |   |    |
| CEO2   | To relate the basic laws of fluids, flow patterns, viscous flow through ducts and their corresponding problems.                                  |   |   |   |   |    |
| CEO3   | To analyze the hydrodynamic forces acting on vanes and their performance evaluation  |   |   |   |   |    |
| CEO4   | To evaluate of the importance, function and performance characteristics of hydro machinery   |   |   |   |   |    |
| <b>Course Outcomes: Upon successful completion of this course, students should be able to:</b> |  |   |   |   |   |    |
| CO1  | Understand the basic properties and characteristics of incompressible fluid.   |   |   |   |   |    |
| CO2  | Apply basic fundamental theorems governing fluid flows i.e., continuity, energy and momentum.  |   |   |   |   |    |

| UNIT:1  |   |     |     |   |   |   |   |   |   |    |    | (12 Hours) |      |   |
| An introduction Object Oriented Programming, Features of Object Oriented Programming Introduction to Java. Difference between C/C++ and Java, Features of Java, First Java Program, Writing the java program, Compiling the program, JVM and its significance in executing a program?, Architecture of JVM. Understanding, Java Tokens, Data types, Operators, Control Structures and Arrays, Conditional Statements, Loops/ Iterators, Jumping Statements, Java Arrays, Multidimensional Arrays, Taking Input from keyboard, Command Line Arguments, Using Scanner Class, Using Buffered Reader class.   |   |     |     |   |   |   |   |   |   |    |    |            |      |   |
| UNIT:2  |   |     |     |   |   |   |   |   |   |    |    | (14 Hours) |      |   |
| Introduction to Classes and Objects. Constructors, static Keyword, this Keyword, Array of Objects, Access Modifiers (Public, Private, Protected, Default). Inheritance, Types of Inheritance and Java supported Inheritance, super, Polymorphism, Method Overloading, Constructor Overloading, Method Overriding, Dynamic Method Dispatching. String Manipulations. Wrapper classes, Auto boxing and unboxing. Abstract classes, Interfaces, Multiple Inheritance Using Interfaces, Java API Packages, User-Defined Packages, Accessing Packages, Error and Exception Handling, Types of exceptions Hierarchy of Exception classes, try, catch, finally, throw, throws, Commonly used Exceptions and their details ,User defined exception classes. |   |     |     |   |   |   |   |   |   |    |    |            |      |   |
| UNIT:3  |   |     |     |   |   |   |   |   |   |    |    | (14 Hours) |      |   |

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

Multithreading, Thread in Java, Thread execution prevention methods. (yield(), join(), sleep()), Concept of Synchronization, Inter Thread Communication, Basics of Deadlock, Demon Thread, Improvement in Multithreading, Inner Classes, Introduction, Member inner class, Static inner class, Local inner class, Anonymous inner class.  
IO Streams (java.io package) , Byte Stream and Character Stream, Files and Random Access Files, Serialization, Collection Frame Work (java.util), Util Package interfaces, List, Set, Map.

UNIT:4 (14 Hours)  
Applet Introduction, Life Cycle of an Applet, GUI with an Applet, Abstract Window Toolkit (AWT), Introduction to GUI, Description of Components and Containers, Component/Container hierarchy, Understanding different Components/Container classes and their constructors, Event Handling, Different mechanisms of Event Handling, Listener Interfaces, Adapter classes.

Teaching Methods: Chalk& Board/ PPT/Video Lectures/Lecture by Industry Expert/

Text Books:

1 Programming in Java. Second Edition. Oxford Higher Education. (Sachin Malhotra/ Saurav Choudhary)

2 Core Java For Beginners. (Rashmi Kanta Das), Vikas Publication

Ref. Books 1. JAVA Complete Reference (9th Edition) Herbart Schelidt

 Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

|      |  |
|------|--|
| CEO1 | Gain a good understanding of the architecture and functioning of Database Management Systems as well as associated tools and techniques. |
| CEO2 | Understand and apply the principles of data modeling using Entity Relationship and develop a good database design.                       |
| CEO3 | Understand the use of Structured Query Language (SQL) and its syntax   |
| CEO4 | Apply Normalization techniques to normalize a database.  |
| CEO5 | Understand the need of Database processing and learn techniques for controlling the consequences of concurrent data access.              |

**Course Outcomes: Upon successful completion of this course, students should be able to:**

|     |   |
|-----|---|
| CO1 | Identify and Classify the concepts of Database Management system, Data models and architecture of database, ER to Relational mapping concepts.  |
| CO2 | Apply the constraints in database using different query languages like:- relational algebra and calculus, SQL and QBE for the implementing the Data definition and data manipulate languages in Database. |
| CO3 | Compare the different normal forms to Apply normalization process to construct the consistent Database.   |
| CO4 | Design and Develop the Database by inspecting concurrency control and recovery strategies to make complete Database without confliction and anomalies in concurrent access environment.                   |

### CO-PO & PSO Mapping

| COs  | PROGRAMME OUTCOMES |     |   |   |   |   |   |   |   |    |    |    | PSOs |   |
|------|--------------------|-----|---|---|---|---|---|---|---|----|----|----|------|---|

| CO4  | 2                  | 1   |   |   |   |   |   |   |   |    |    |    |      |   |
| Avg. | 2.5                | 1.5 |   |   |   |   |   |   |   |    |    |    |      |   |

### SYLLABUS

|   |     |
|---|-----|
| UNIT:1<br>Hours)<br>Introduction to database Systems, advantages of database system over traditional file system, Basic concepts & Definitions, Database users, Database Language, Database System Architecture, Schemas, Sub Schemas, & Instances, database constraints, 3-level database architecture, Data Abstraction, Data Independence, Mappings, Structure, Components & functions of DBMS, Data models. | (15 |
| UNIT:2  | (13 |

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A Grade and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

|   |      |
|---|------|
| Hours)<br>Entity relationship model, Components of ER model, Mapping E-R model to Relational schema, Relational Algebra, Tuple & Domain Relational Calculus, Relational Query Languages: SQL and QBE. Database Design:-Database development life cycle (DDLCC), Automated design tools, Functional dependency and Decomposition, Join strategies, Dependency Preservation & lossless Design, Normalization, Normal forms:1NF, 2NF,3NF, and BCNF, Multi-valued Dependencies, 4NF & 5NF. Query processing and optimization: Evaluation of Relational Algebra Expressions, Query optimization, Query cost estimation |      |
| UNIT:3<br>Hours)<br>Network and Object Oriented Data models, Storage Strategies: Detailed Storage Architecture, Storing Data, Magnetic Disk, RAID, Other Disks, Magnetic Tape, Storage Access, File & Record Organization, File Organizations & Indexes, Order Indices, B+ Tree Index Files, Hashing Data Dictionary.   | (10) |
| UNIT:4<br>Hours)<br>Transaction processing and concurrency control: Transaction concepts, properties of transaction, concurrency control, locking and Timestamp methods for concurrency control schemes. Database Recovery System, Types of Data Base failure & Types of Database Recovery, Recovery techniques, fundamental concepts on Object-Oriented Database, Object relational database, distributed database, Parallel Database, introduction to Data warehousing & Data Mining.   | (12) |
| Text Books:<br>1 Sudarshan, Korth: Database System Concepts, 6th edition, McGraw-Hill Education<br>2. Elmasari &Navathe: Fundamentals of Database System, Pearson Education.  |      |
| References Books:<br>1. Elmasari &Navathe: Fundamentals of Database System, Pearson Education.<br>2. Ramakrishnan: Database Management Systems, McGraw-Hill Education.<br>3. Andrew S. Tanenbaum: Modern Operating Systems, 3rd Edition, Pearson Education.<br>4. Terry Dawson, Olaf Kirch: Linux Network Administrator's Guide, 3rd Edition O'Reilly Media   |      |

| <b>Course Educational Objectives</b>   |   |          |          |          |          |    |
| CEO1   | Students will have the opportunity to apply loads to various materials under different equilibrium conditions   |          |          |          |          |    |
| CEO2   | The student will perform tests on materials in tension, compression, torsion, bending and impact  |          |          |          |          |    |
| CEO3   | The machines and equipment used to determine experimental data include universal testing machines, torsion equipment, spring testing machine, compression testing machine, impact tester, hardness tester                     |          |          |          |          |    |
| CEO4   | Data will be collected using Dial indicators, extensometers, strain gages and strain indicator equipment, as well as load and strain readouts on the machinery and graphing capabilities to print relevant plots for analysis |          |          |          |          |    |
| CEO5   | Analysis of subsequent data obtained from the performed test and to present the results in a professionally prepared report   |          |          |          |          |    |
| <b>Course Outcomes: Upon successful completion of this course, students should be able to:</b> |   |          |          |          |          |    |
| CO1  | Conduct tension, compression & bending test on UTM.   |          |          |          |          |    |
| CO2  | Perform impact & fatigue test of mild steel specimen.   |          |          |          |          |    |
| CO3  | Determine the Brinell, Rockwell and Vicker's hardness of different material.  |          |          |          |          |    |
| CO4  | Measure strain by using strain gauge and strain rosette.  |          |          |          |          |    |
| CO-PO & PSO Mapping  |   |          |          |          |          |    |

## LIST OF EXPERIMENTS

LIST OF EXPERIMENT (Minimum 8 experiments )

1. Determination of tensile strength of materials by Universal Testing Machine
2. Determination of compressive strength of materials by Universal Testing Machine
3. Determination of bending strength of materials by Universal Testing Machine
4. Double shear test in Universal Testing Machine
5. Determination of Impact strength of material (Charpy and Izod)
6. Determination of Hardness strength of materials (Brinell, Rockwell and Vickers)
7. Determination of Rigidity modulus of material
8. Determination of Fatigue strength of material
9. Estimation of Spring Constant under Tension and Compression.
10. Load measurement using Load indicator, Load Cells.
11. Strain measurement using Strain Gauge.
12. Stress measurement using strain rosette.

 Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

| SUBJECT CODE | COURSE TITLE                                      | L | T | P | C | QP |
|--------------|---|---|---|---|---|----|
| BMEPC3120    | FLUID MECHANICS AND HYDRAULIC MACHINES LABORATORY | 0 | 0 | 2 | 1 |    |

Pre -Requisite: Mathematics, Fluid Mechanics and Hydraulic Machines

### Course Educational Objectives

|      |  |
|------|--|
| CEO1 | To know the concept of fluid and its properties, manometer, hydrostatic forces acting on different surfaces and also problem solving techniques. |
| CEO2 | To relate the basic laws of fluids, flow patterns, viscous flow through ducts and their corresponding problems.                                  |
| CEO3 | To analyze the hydrodynamic forces acting on vanes and their performance evaluation  |
| CEO4 | To evaluate of the importance, function and performance characteristics of hydro machinery   |

### Course Outcomes: Upon successful completion of this course, students should be able to:

|     |  |
|-----|--|
| CO1 | Discuss the differences among measurement techniques, their relevance and applications.    |
| CO2 | Explain the condition of floating and submerging of any object in water.                   |
| CO3 | Analyze the various parameters of flow through orifice, Notch and Venturimeter             |
| CO4 | Calculate the performance analysis of turbines and pumps that can be used in power plants. |

### CO-PO & PSO Mapping

### LIST OF EXPERIMENTS

List of Experiment: (Minimum 8 Experiments)

1. Determination of Metacentric Height and application to stability of floating bodies.
2. Determination of Cv and Cd of Orifices.
3. Experiments on impact of Jets
4. Experiments on performance of Pelton Turbine
5. Experiments on performance of Francis Turbine
6. Experiments on performance of Kaplan Turbine
7. Experiments on performance of centrifugal pump
8. Experiments on performance of reciprocating pump
9. Experiments on Reynold's Apparatus
10. Experiments on Flow through pipes

| Pre -Requisite: None   |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| <b>Course Educational Objectives</b>   |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| CEO1   | Design and create a ERD (Entity Relationship Diagram) using software tool.   |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| CEO2   | Learn how to design and create and use a relational database system.   |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| <b>Course Outcomes: Upon successful completion of this course, students should</b> |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| CO1  | Implement the concept of Entity-Relationship (E-R) model from specified information and to transform into to relational model. |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| CO2  | Apply the different types of Constraints in relational database and defines the database.                                      |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| CO3  | Compares the different types of manipulation and access methods of data from database.   |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| CO4  | Analyze and simple database application that demonstrates understanding of all the above, working as a team.                   |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| CO-PO & PSO Mapping  |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| COs  | PROGRAMME OUTCOMES   |   |     |   |   |   |   |   |   |    |    |    | PSOs |   |   |   |    |
|  | 1  | 2 | 3   | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 1    | 2 |   |   |    |
| CO1  | 3  |   | 2   |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| CO2  | 3  |   | 3   |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| CO3  | 2  |   | 2   |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| CO4  | 2  |   | 3   |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| Avg  | 2.5  |   | 2.5 |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| LIST OF EXPERIMENTS  |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| List of Experiment: (Minimum 8 Experiments)  |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| 1. Use of SQL syntax: insertion, deletion, join, updation using SQL.               |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| 2. Programs on join statements and SQL queries including where clause.             |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| 3. Programs on procedures and functions.   |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| 4. Programs on database triggers.  |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| 5. Programs on packages.   |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| 6. Programs on data recovery using check point technique.                          |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| 7. Concurrency control problem using lock operations.                              |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| 8. Programs on ODBC using either VC++.   |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| 9. Programs on JDBC.   |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| 10. Programs on embedded SQL using C / C++ as host language.                       |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| Additional Assignments   |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| 1. Use of NoSQL database like MongoDB.   |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |
| 2. Programs on connectivity to MongoDB using MEAN.                                 |  |   |     |   |   |   |   |   |   |    |    |    |      |   |   |   |    |

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
 Accredited by NAAC with a CGPA of 3.28/4 at A Grade and Accredited by NBA  
 Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

3. Programs on connectivity to Mongo-DB using Python.

## IV SEMESTER [SECOND YEAR]

| SUBJECT CODE   | TITLE OF THE SUBJECT   | L | T | P | C | QP   |
|--|--|---|---|---|---|------|
| BMEPC4020  | KINEMATICS OF MACHINERY  | 3 | 1 | 0 | 4 | A    |
| Pre -Requisite: Basic of Mechanics (Statics) topics like: Equilibrium of forces, Free body diagram, friction and D'Alemberts principle |  |   |   |   |   |      |
| <b>Course Educational Objectives</b>   |  |   |   |   |   |      |
| CEO 1  | To obtain an idea of Mechanisms, basic of methodology of machines  |   |   |   |   |      |
| CEO 2  | Apply knowledge to the selection of proper techniques and processes for velocity and acceleration using graphical and analytical techniques                    |   |   |   |   |      |
| CEO 3  | Basic knowledge of different types of Piston effort, force acting along the connecting rod, Crank effort, Turning moment on crank - shaft                      |   |   |   |   |      |
| CEO 4  | Analyze and study of various types of clutches and pivots, dynamometers, Various gear trains and classification of brakes etc                                  |   |   |   |   |      |
| <b>Course Outcomes: Upon successful completion of this course, students should be able to:</b>   |  |   |   |   |   |      |
| CO1  | Recognize the basic of elements of mechanisms and describe, understand differentiate between mechanisms, solve for mobility with synthesis of mechanisms.      |   |   |   |   |      |
| CO2  | Apply the concept of mechanism to interpret and examine the velocity and acceleration of different linkages in mechanisms by analytical and graphical methods. |   |   |   |   |      |
| CO3  | Analyze the effect of friction and estimate the loss of power due to friction between moving elements (i.e., Gears, clutches, brakes, belt drives etc...)      |   |   |   |   |      |
| CO4  | Propose for the engineering challenges regarding human needs in daily life about machines and systems which are possible due to the design of machines.        |   |   |   |   |      |
| CO-PO & PSO Mapping  |  |   |   |   |   |      |

## SYLLABUS

UNIT:1 (No of Hours.12)  
 Mechanisms and machines, Rigid and resistant bodies, Link, Kinematic pair, Degrees of Freedom, Classifications of Kinematic pairs, kinematic-chain, Linkage, Mechanism, and structure, Classification of mechanisms, Equivalent Mechanisms, Four - Link (bar) Mechanism, Inversions of Slider - Crank Chain, Double – Slider Chain.  
**VELOCITY ANALYSIS:** Introduction, Absolute and Relative Motion, Vectors, Addition and subtraction of Vectors, Motion of a Link, Four Link Mechanism, Angular Velocity of Links, Velocity of Rubbing, Slider - Crank Mechanism, Crank and Slotted Lever Mechanism.

UNIT:2 (No of Hours10)  
 PLANE MOTION OF BODY : Instantaneous centre, Notation, Number of I - Centres, Kennedy's theorem, Locating I - Centres, Angular velocity by I - Centre Method  
 ACCELERATION ANALYSIS:  
 Acceleration, Four-Link Mechanism, , slider-Crank Mechanism Angular acceleration of Links, Acceleration of Intermediate and offset points, Coriolis acceleration component, Crank and slotted lever Mechanism.

UNIT:3 (No of Hours10)  
**KINEMATIC SYNTHESIS:**  
 Stages of synthesis-Concepts of type, Number and dimensional synthesis - Tasks of dimensional synthesis, Concepts of function generation, Rigid body guidance and path generation, Freudenstein equation for function generation using three precision points.  
 Cams: Definitions of cam and followers – their uses – Types of followers and cams – Terminology – Types of follower motion - Uniform velocity, Simple harmonic motion and uniform acceleration and retardation. Maximum velocity and maximum acceleration during outward and return strokes, Graphical synthesis of cam profile

UNIT:4 (No of Hours12)  
**GEARS :** Introduction, Classification gear terminology, Law of Gearing, Velocity of Sliding, Forms of Teeth, Cycloidal Profile Teeth, Involute Profile Teeth, Path of contact, Arc of contact, Number of pairs of Teeth in contact, Interference in Involute Gears, Minimum number of Teeth, Interference between Rack and

## SYLLABUS

|  |            |
|--|------------|
| UNIT:1   | [10 Hours] |
| Metal Casting Processes: sand mold making procedure. Patterns: Pattern materials, pattern allowances, types of pattern, color coding. Molding materials: Molding sand composition, sand preparation, sand properties and testing, Sand molding processes. Cores: Types of cores, core prints, chaplets, and chills. Design of Gating systems: Melting practice: Cupola furnace, solidification, defects in castings and their remedies, Shell molding, precision investment casting, permanent mold casting, die casting, centrifugal casting, continuous casting, Advantages and limitations. |            |
| UNIT:2   | [10 Hours] |
| Welding Process: Principles of welding, brazing and soldering, Classification of Welding Processes, gas welding and cutting process, equipment. Arc welding power source and consumables. Resistance welding: Principle and equipments, resistance spot welding, resistance seam welding, electro slag welding, forge welding. Modern welding methods like plasma arc, laser beam, Electron beam, Ultrasonic, Explosive and friction welding. Destructive and Non destructive testing of casting and welding.  |            |
| UNIT:3   | [12 Hours] |
| Metal Forming Processes:<br>Nature of plastic deformation, hot working and cold working .Principles of rolling, roll passes, roll pass sequences. Forging: Forging operations, smith forging, drop forging, press forging, forging defects.<br>Extrusion and Sheet metal operations:<br>Extrusion principle, hot extrusion, cold extrusion, wire drawing, swaging, tube making. Sheet metal operations: Press tools operations, shearing action, drawing dies, spinning, bending, stretch forming, embossing and coining.  |            |
| UNIT:4   | [10 Hours] |
| Powder Metallurgy: Powder manufacturing, compaction and sintering processes. Advantages and applications of Powder Metallurgy. Brief introduction to explosive   |            |

gauge ballast circuit, the starting gauge bridge circuit, Temperature compensation. Measurement of Pressure Pressure measurement systems, Pressure measurement transducers, Elastic diaphragms, strain gauge pressure cells, measurement of high pressure, Measurement of low pressures, dynamic characteristics of pressure measuring systems. Measurement of Fluid Flow characteristics obstruction meters, Obstruction meter for compressible fluids- Orifice, Venturi meter and Pitot tube, The variable-area meter, Turbine Flow meters. Temperature Measurement Use of bimetals pressure thermometers, Thermocouples, Pyrometry, Calibration of temperature measuring devices. Force, Power, Speed and Torque Measurement : Load Cell, Dynamometers, Tachometer and Tachogenerator, Stroboscope, The seismic instrument.- Vibrometers and accelerometers.

UNIT:4 [10 Hours]  
 Principles of Measurements, Line and End & optical Standards, Calibration, accuracy and Precision, Random error and systemic error. Measurement of Surface Roughness, Screw Thread and Gears. Limits, Fits and Gauges, Assembly by full, partial and group interchangeability, geometric tolerances. Measurement of straightness, Flatness and circularity.

|   |            |
|---|------------|
| UNIT:2  | (14 Hours) |
| Introduction to Classes and Objects. Constructors, static Keyword, this Keyword, Array of Objects, Access Modifiers (Public, Private, Protected, Default). Inheritance, Types of Inheritance and Java supported Inheritance, super, Polymorphism, Method Overloading, Constructor Overloading, Method Overriding, Dynamic Method Dispatching. String Manipulations. Wrapper classes, Auto boxing and unboxing. Abstract classes, Interfaces, Multiple Inheritance Using Interfaces, Java API Packages, User-Defined Packages, Accessing Packages, Error and Exception Handling, Types of exceptions Hierarchy of Exception classes, try, catch, finally, throw, throws, Commonly used Exceptions and their details ,User defined exception classes. |            |
| UNIT:3  | (14 Hours) |
| Multithreading, Thread in Java, Thread execution prevention methods. (yield(), join(), sleep()), Concept of Synchronization, Inter Thread Communication, Basics of Deadlock, Demon Thread, Improvement in Multithreading, Inner Classes, Introduction, Member inner class, Static inner class, Local inner class, Anonymous inner class.<br>IO Streams (java.io package) , Byte Stream and Character Stream, Files and Random Access Files, Serialization, Collection Frame Work (java.util), Util Package interfaces, List, Set, Map.  |            |
| UNIT:4  | (14 Hours) |
| Applet Introduction, Life Cycle of an Applet, GUI with an Applet, Abstract Window Toolkit (AWT), Introduction to GUI, Description of Components and Containers, Component/Container hierarchy, Understanding different Components/Container classes and their constructors, Event Handling, Different mechanisms of Event Handling, Listener Interfaces, Adapter classes.   |            |
| Teaching Methods: Chalk& Board/ PPT/Video Lectures  |            |
| Text Books:   |            |
| 1 Programming in Java. Second Edition. Oxford Higher Education. (Sachin Malhotra/ Saurav Choudhary)   |            |
| 2 Core Java For Beginners. (Rashmi Kanta Das), Vikas Publication  |            |
| Ref. Books 1. JAVA Complete Reference (9th Edition) Heribalt Schelidt   |            |

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
 Accredited by NAAC with a CGPA of 3.28/4 at A Grade and Accredited by NBA  
 Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

|--|---|-----|---|---|---|---|---|---|---|----|----|----|------|-----|---|----|
| BCSES3052  | DATABASE MANAGEMENT SYSTEMS   |     |   |   |   |   |   |   |   |    |    | 3  | 0    | 0   | 3 | A  |
| Pre -Requisite:  |   |     |   |   |   |   |   |   |   |    |    |    |      |     |   |    |
| <b>Course Educational Objectives</b>   |   |     |   |   |   |   |   |   |   |    |    |    |      |     |   |    |
| CEO1   | Gain a good understanding of the architecture and functioning of Database Management Systems as well as associated tools and techniques.  |     |   |   |   |   |   |   |   |    |    |    |      |     |   |    |
| CEO2   | Understand and apply the principles of data modeling using Entity Relationship and develop a good database design.  |     |   |   |   |   |   |   |   |    |    |    |      |     |   |    |
| CEO3   | Understand the use of Structured Query Language (SQL) and its syntax  |     |   |   |   |   |   |   |   |    |    |    |      |     |   |    |
| CEO4   | Apply Normalization techniques to normalize a database.   |     |   |   |   |   |   |   |   |    |    |    |      |     |   |    |
| CEO5   | Understand the need of Database processing and learn techniques for controlling the consequences of concurrent data access.   |     |   |   |   |   |   |   |   |    |    |    |      |     |   |    |
| <b>Course Outcomes: Upon successful completion of this course, students should be able to:</b>   |   |     |   |   |   |   |   |   |   |    |    |    |      |     |   |    |
| CO1  | Identify and Classify the concepts of Database Management system, Data models and architecture of database, ER to Relational mapping concepts.  |     |   |   |   |   |   |   |   |    |    |    |      |     |   |    |
| CO2  | Apply the constraints in database using different query languages like:- relational algebra and calculus, SQL and QBE for the implementing the Data definition and data manipulate languages in Database. |     |   |   |   |   |   |   |   |    |    |    |      |     |   |    |
| CO3  | Compare the different normal forms to Apply normalization process to construct the consistent Database.   |     |   |   |   |   |   |   |   |    |    |    |      |     |   |    |
| CO4  | Design and Develop the Database by inspecting concurrency control and recovery strategies to make complete Database without confliction and anomalies in concurrent access environment.                   |     |   |   |   |   |   |   |   |    |    |    |      |     |   |    |
| CO-PO & PSO Mapping  |   |     |   |   |   |   |   |   |   |    |    |    |      |     |   |    |
| COs  | PROGRAMME OUTCOMES  |     |   |   |   |   |   |   |   |    |    |    | PSOs |     |   |    |

| <b>SYLLABUS</b>  |     |   |     |      |   |     |  |  |  |  |  |  |
| UNIT:1 (10 Hours)<br>Ecological Concepts: Biotic components, Ecosystem Process: Energy, Food Chain, Water cycle, Oxygen cycle, Nitrogen cycle etc., Environmental gradients, Tolerance levels of environment factor, EU, US and Indian Environmental Law. Chemistry in Environmental Engineering: Atmospheric chemistry, Soil chemistry. Noise pollution Noise standards, measurement and control. Water Treatment: water quality standards and parameters, Ground water. Water treatment processes, Pre treatment of water, Conventional process, Advanced water treatment process. |     |   |     |      |   |     |  |  |  |  |  |  |
| UNIT:2 (12 Hours)<br>Waste Water Treatment: DO and BOD of Waste water treatment process, pretreatment, primary and secondary treatment of waste water, Activated sludge treatment: Anaerobic digestion ,Reactor configurations and methane production. Air Pollution: Air pollution and pollutants, criteria pollutants, Acid deposition, Global climate change – greenhouse gases, non criteria pollutants, Air pollution meteorology, Atmospheric dispersion. Industrial Air Emission Control. Flue gas desulphurization, NOx removal, Fugitive emissions.                         |     |   |     |      |   |     |  |  |  |  |  |  |
| UNIT:3 (10 Hours)<br>Solid waste, Hazardous waste management, Solid Waste Management, Source classification and composition of MSW: Separation, storage and transportation, Reuse and recycling, Waste Minimization Techniques. Hazardous Waste Management, Hazardous waste and their generation, Transportation and treatment: Incinerators, Inorganic waste treatment. E.I.A., Environmental auditing.   |     |   |     |      |   |     |  |  |  |  |  |  |
| UNIT:4 (10 Hours)<br>Occupational Safety and Health Acts, Safety procedures, Type of Accidents, Chemical and Heat Burns, Prevention of Accidents involving Hazardous substances, Human error. Hazard Control Measures in steel industry, Petroleum Refinery, Pharmaceutical industry. Fire Prevention Detection, Extinguishing Fire, Safety Management Safety Handling and Storage of Hazardous Materials, Corrosive Substances, Hydro Carbons Wastes. Personal Protective Equipments.   |     |   |     |      |   |     |  |  |  |  |  |  |

## GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

(12 Hours)

Time value of money Interest Analysis Simple and compound, nominal and effective rate of interest, Cash flow diagrams, Principles of economic equivalence. Evaluation of engineering projects Present worth method, Future worth method, Annual worth method, Internal rate of return method, Cost benefit analysis for public projects. Sensitivity Analysis, Replacement Analysis Determination of economic life of an asset, Replacement of existing asset with a new asset.

UNIT:4

(10 Hours)

Overview of Indian financial system. Commercial bank, Functions of commercial bank, Credit creation, Central bank, Functions of Central Bank. Inflation Meaning of inflation, types, causes, measures to control inflation. National Income Definition, Concepts of national income, Method of measuring national income

Teaching Methods: Chalk& Board/ PPT/Video Lectures

| SUBJECT CODE   | COURSE TITLE  |   |   |   |   |   |   |   |   |    | L    | T | P | C | QP |
|--|---|---|---|---|---|---|---|---|---|----|------|---|---|---|----|
| BMEPC4110  | ENGINEERING THERMODYNAMICS LABORATORY   |   |   |   |   |   |   |   |   |    |      |   | 2 | 1 |    |
| Pre -Requisite: Thermodynamics   |   |   |   |   |   |   |   |   |   |    |      |   |   |   |    |
| <b>Course Educational Objectives</b>   |   |   |   |   |   |   |   |   |   |    |      |   |   |   |    |
| CEO1   | Students will recall the basic principle of Thermodynamics and Understand the working principle of IC Engines, steam & Gas power plant, Refrigeration system etc. |   |   |   |   |   |   |   |   |    |      |   |   |   |    |
| CEO2   | Students will able to identify the methods to increase the efficiency of Air compressor and gear oil pump.  |   |   |   |   |   |   |   |   |    |      |   |   |   |    |
| CEO3   | Students can estimate steam quality calculations using calorimeter and joule Thomson coefficient  |   |   |   |   |   |   |   |   |    |      |   |   |   |    |
| CEO4   | Students can capable to design pneumatic machinery components, IC engines, calorimeter as per the performance   |   |   |   |   |   |   |   |   |    |      |   |   |   |    |
| <b>Course Outcomes: Upon successful completion of this course, students should be able to:</b> |   |   |   |   |   |   |   |   |   |    |      |   |   |   |    |
| CO1  | Recall the basic principle of Thermodynamics and Understand the working principle of IC Engines, steam & Gas power plant, Refrigeration system.                   |   |   |   |   |   |   |   |   |    |      |   |   |   |    |
| CO2  | Identify the methods to increase the efficiency of Air compressor and gear oil pump.  |   |   |   |   |   |   |   |   |    |      |   |   |   |    |
| CO3  | Estimate steam quality calculations using calorimeter and joule Thomson coefficient etc.  |   |   |   |   |   |   |   |   |    |      |   |   |   |    |
| CO4  | Design pneumatic machinery components, IC engines, calorimeter as per the performance.  |   |   |   |   |   |   |   |   |    |      |   |   |   |    |
| CO-PO & PSO Mapping  |   |   |   |   |   |   |   |   |   |    |      |   |   |   |    |
| COs  | PROGRAMME OUTCOMES  |   |   |   |   |   |   |   |   |    | PSOs |   |   |   |    |

|--|
| fuels.<br>Introduction to Alternative Fuels: LPG, LNG, CNG, Alcohol, Hydrogen, Vegetable oils and Biogas.  |
| UNIT:2 [ 14 Hours]<br>Carburetion and Fuel injection: Function of carburetors, Description and principle of simple carburettor and its drawback, petrol injections. Requirements of diesel injections system. Types of injection systems, Fuel pumps and nozzles, types of fuel injections, Spray formation, penetration and direction. Combustion of Fuels: Stages of SI engine combustion, Effect of engine variables on ignition lag and flame propagation, fuel knock, control of knock. SI engine combustion chamber stage of diesel combustion, variables affecting delay period. Diesel knock and methods of control. CI engine combustion chambers |
| UNIT:3 [10 Hours]<br>Supercharging and scavenging: Thermodynamic cycle with supercharging and its effect. Efficiency of supercharging engines Methods of supercharging and scavenging of two stroke engines. Turbo charging: Methods of turbo charging, effects of turbo charging on performance   |
| UNIT:4 [12 Hours]<br>Testing and Performance: Fuel air and power measurement methods. Performance of SI and CI engines, Characteristic curves, Governing of speed. Engine Emission and Control:<br>Engine Emissions and its harmful effects. Gasoline and Diesel emission. Methods of measuring pollutants controlling of engine emission. Cooling Lubrication and ignition systems: Air cooling and water cooling systems effects of cooling on power output and efficiency. Properties of lubricants additives lubricating systems. Battery, Magnet ignition systems ignition timing.  |

## SYLLABUS

UNIT:1 (12 Hours)  
 Dynamic Force Analysis : Introduction, D'Alembert's Principle, Equivalent Offset Inertia Force, Dynamic Analysis of Slider - Crank mechanism (Using Analytical method) Velocity and Acceleration of piston, Angular velocity and Angular Acceleration of Connecting Rod, Piston Effort (Effective Driving Force), Crank Effort, Turning moment diagram –fluctuation of energy.  
 Mechanisms with lower pairs: Motor Vehicle Steering Gears - Davis Steering Gear & Ackermann Steering Gear, Hooke's Joint.

UNIT:2 (12 Hours)  
 Gyroscopes – effect of precession – motion on the stability of moving vehicles such as motorcycle – motorcar – aeroplanes and ships.  
 Governors: Types of governors - Watt, Porter and Proell governors. Spring loaded governors – Hartnell and Hartung with auxiliary springs. Sensitiveness, isochronisms and hunting – stability – effort and power of the governors.

UNIT:3 (10 Hours)  
 Friction: pivots and collars – uniform pressure, uniform wear – friction circle and friction axis. Clutches – Types – Single plate, multi-plate and cone clutches.  
 Brakes and Dynamometers: Types of brakes: Simple block brake, band and block brake-internal expanding shoe brake-effect of braking of a vehicle. Dynamometers – absorption and transmission types. General description and methods of operation

UNIT:4 (16 Hours)  
 Balancing : Balancing of rotating masses- Primary, Secondary, and higher balancing of reciprocating masses. Analytical and graphical methods. Unbalanced forces and couples.  
 Examination of "V" and multi cylinder in-line and radial engines for primary and

## SYLLABUS

Unit – I [10Hrs]  
 Fundamentals of OB: Definition, scope and importance of OB, Relationship between OB and the individual, Evolution of OB, Theoretical framework (cognitive), behaviouristic and social cognitive), Limitations of OB.  
 Attitude: Importance of attitude in an organization, Right Attitude, Components of attitude, Relationship between behaviour and attitude, Developing Emotional intelligence at the workplace, Job attitude, Barriers to changing attitudes.  
 Personality and values: Definition and importance of Personality for performance, The Myers-Briggs Type Indicator and The Big Five personality model, Significant personality traits suitable to the workplace (personality and job – fit theory), Personality Tests and their practical applications.  
 Perception: Meaning and concept of perception, Factors influencing perception, Selective perception, Attribution theory, Perceptual process, Social perception (stereotyping and halo effect).  
 Motivation: Definition & Concept of Motive & Motivation, The Content Theories of Motivation (Maslow's Need Hierarchy & Herzberg's Two Factor model Theory), The Process Theories (Vroom's expectancy Theory & Porter Lawler model), Contemporary Theories – Equity Theory of Work Motivation.

| SUBJECT CODE   | COURSE TITLE   |   |      |      |      |   |   |   |   |    |    |    | L    | T | P | C | QP |
|--|--|---|------|------|------|---|---|---|---|----|----|----|------|---|---|---|----|
| BMEPC5130  | DESIGN OF MACHINE ELEMENTS<br>LABORATORY   |   |      |      |      |   |   |   |   |    |    |    | 0    | 0 | 2 | 1 |    |
| Pre -Requisite: Engineering Drawing, Mathematics   |  |   |      |      |      |   |   |   |   |    |    |    |      |   |   |   |    |
| <b>Course Educational Objectives</b>   |  |   |      |      |      |   |   |   |   |    |    |    |      |   |   |   |    |
| CEO1   | The primary objective of this course is to demonstrate how engineering design uses the many principles learned in previous engineering science courses and to show how these principles are practically applied.                     |   |      |      |      |   |   |   |   |    |    |    |      |   |   |   |    |
| CEO2   | The emphasis in this course is on machine design: the design and creation of devices that consist of interrelated elements used to modify force and/or motion  |   |      |      |      |   |   |   |   |    |    |    |      |   |   |   |    |
| CEO3   | The type of design addressed in this course is that of detailed design, which is to define the shape, size and material of a particular machine element such that it will not fail under the expected load and operating conditions. |   |      |      |      |   |   |   |   |    |    |    |      |   |   |   |    |
| CEO4   | To design and draw the different components of mechanical Engineering system.  |   |      |      |      |   |   |   |   |    |    |    |      |   |   |   |    |
| <b>Course Outcomes: Upon successful completion of this course, students should be able to:</b> |  |   |      |      |      |   |   |   |   |    |    |    |      |   |   |   |    |
| CO1  | Construct an assembly drawing of tail-stock of lathe and screw jack including bill of materials  |   |      |      |      |   |   |   |   |    |    |    |      |   |   |   |    |
| CO2  | Draw the machine elements including riveted joint, cotter joint and knuckle joint  |   |      |      |      |   |   |   |   |    |    |    |      |   |   |   |    |
| CO3  | Design of shaft subjected to combined loading.   |   |      |      |      |   |   |   |   |    |    |    |      |   |   |   |    |
| CO4  | Design and drawing of flange coupling, lever, belt and pulley  |   |      |      |      |   |   |   |   |    |    |    |      |   |   |   |    |
| CO-PO & PSO Mapping  |  |   |      |      |      |   |   |   |   |    |    |    |      |   |   |   |    |

## SYLLABUS

|  |            |
|--|------------|
| UNIT:1   | [15 Hours] |
| <p>Introduction to heat transfer:<br/>         Modes of heat transfer: conduction, convection, and radiation ,Mechanism &amp; basic laws governing conduction, convection, and radiation heat transfer; Thermal conductivity, Thermal conductance &amp; Thermal resistance, Contact resistance, convective heat transfer coefficient, radiation heat transfer coefficient , Electrical analogy, combined modes of heat transfer.</p> <p>Heat conduction:<br/>         The General heat conduction in Cartesian, polar-cylindrical and polar-spherical co-ordinates, Simplification of the general equation for one and two dimensional steady/transient conduction with constant/ variable thermal conductivity with / without heat generation.<br/>         Solution of the one dimensional steady state heat conduction problem in case of plane walls, cylinders and spheres for simple and composite cases. Critical insulation thickness, Heat transfer in extended surfaces (pin fins) without heat generation, Long fin, short fin with insulated tip and without insulated tip and fin connected between two heat sources. Fin efficiency and fin effectiveness. Conduction in solids with negligible internal temperature gradient (Lumped heat analysis)</p> |            |
| UNIT:2   | [15 Hours] |
| <p>Convective heat transfer:<br/>         Introduction to convective flow - forced and free, Physical significance of Grashoff , Reynolds, Prandtl, Nusselt and Stanton numbers. Conservation equations for mass, momentum and energy for 2-dimensional convective heat transfer in case of incompressible flow, Hydrodynamic and thermal boundary layers for flow over a flat plate. Critical Reynolds number; general expressions for drag coefficient and drag force Reynolds-Colbourn analogy. Thermal boundary layer; general expression for local heat transfer coefficient; Average heat transfer Coefficient; Nusselt number. Use of empirical relations for solving turbulent conditions for external and internal flow. Mechanism of heat transfer during natural convection, Experimental heat transfer correlations for natural</p>  |            |

|   |            |
|---|------------|
| convection in the following cases<br>(a) Vertical and horizontal plates<br>(b) Inside and outside flows in case of tubes  |            |
| UNIT:3  | [10 Hours] |
| Radiative heat exchange:<br>Introduction, Radiation properties, definitions of various terms used in radiation heat transfer; Absorptivity, reflectivity & transmissivity. Emissive power & emissivity, Kirchhoff's identity, Planck's relation for monochromatic emissive power of a black body, Derivation of Stefan-Boltzmann law and Wien's displacement law from Planck's relation, Radiation shape factor, Relation for shape factor and shape factor algebra. Heat exchange between black bodies through non-absorbing medium. Gray bodies and real bodies, Heat exchange between gray bodies. Radiosity and Irradiation, Radiation shields. |            |
| UNIT:4  | [8 Hours]  |
| Introduction, Types of heat exchanger, the overall heat transfer coefficient and fouling factors, LMTD and E- NTU analysis of heat exchangers. Heat transfer for boiling liquids and condensing vapours: Types of condensation, use of correlations for condensation on vertical flat surfaces, horizontal tube and; regimes of pool boiling, pool boiling correlations. Critical heat flux, concept of forced boiling. Numericals.   |            |
| Teaching Methods: Chalk & Board   |            |

## SYLLABUS

|   |            |
|---|------------|
| UNIT:1  | [14 Hours] |
| Analysis of stress:-<br>Introduction to stress analysis in elastic solids - stress at a point – stress tensor – stress components in rectangular coordinate system - Cauchy's equations – stress transformation – principal stresses and planes –stress invariants - hydrostatic and deviatoric stress components, octahedral shear stress –differential equations of equilibrium, plane stress, Mohr's circle for 3D state of stress.<br>Analysis of strain:-<br>Engineering strain - strain tensor (basics only) – analogy between stress and strain tensors - strain-displacement relations (small-strain only) – stress compatibility equation, Airy's stress function and Bi-harmonic equation |            |
| UNIT:2  | [12 Hours] |
| Axisymmetric problems – governing equations – application to thick cylinders, compound cylinder, shrink fit, Bending of Curved Beam, stress distribution in beam with rectangular, circular & trapezoidal section. Stresses in crane hook, ring and chain link  |            |

## GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

|  |            |
|--|------------|
| Unsymmetrical bending of straight beams, Deflection of unsymmetrical bending.  |            |
| UNIT:3   | [12 Hours] |
| Strain energy of deformation – special cases of a body subjected to concentrated loads, moment or torque - reciprocal relation – strain energy of a bar subjected to axial force, shear force, bending moment and torque.<br>Maxwell reciprocal theorem – Castigliano's first and second theorems – virtual work principle – minimum potential energy theorem.   |            |
| UNIT:4   | [10 Hours] |
| Torsion of non-circular bars: Saint Venant's theory - solutions for circular and elliptical cross-sections Prandtl's method - solutions for circular and elliptical cross-sections - membrane analogy. Torsion of thin walled tubes, thin rectangular sections, rolled sections and multiply connected sections Variable stresses – reversed cyclic stress, fluctuating stress, alternating stress, stress concentration, stress concentration factor, notch sensitivity |            |
| Teaching Methods: Chalk& Board   |            |
| Text Books:<br>1. Advanced Mechanics of Solids, L.S. Srinath, Tata McGraw Hill<br>2. Advanced Mechanics of Materials : Boresi and Schmidt, Willey  |            |
| Ref. Books:<br>1. Advanced Mechanics of Materials : Siley and Smith<br>2. Strength of Materials Vol.II, by S.Timoshenko<br>3. Mechanical Metallurgy by Dieter  |            |

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
 Accredited by NAAC with a CGPA of 3.28/4 at A Grade and Accredited by NBA  
 Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

| Subject Code | TITLE OF THE SUBJECT    | L | T | P | C | QP |
|--------------|-------------------------|---|---|---|---|----|
| BMEPE6032    | ADVANCE FLUID MECHANICS | 3 | 0 | 0 | 3 | A  |

Pre -Requisite: Mathematics, Basics of Mechanics and Fluid Mechanics and Hydraulic Machines

### Course Educational Objectives

|       |  |
|-------|--|
| CEO 1 | To understand the basic tools for the analysis and solution of different types of flows  |
| CEO 2 | To derive the partial differential equations governing the conservation of mass, momentum, and energy of an incompressible Newtonian fluid |
| CEO 3 | To obtain dimensionless form of the governing equations and extract the dimensionless parameters from them to determine the flow field.    |
| CEO 4 | To derive the boundary layer equations and show how to obtain exact and approximate integral solutions.                                    |

### Course Outcomes: Upon successful completion of this course, students should be able to:

|     |  |
|-----|--|
| CO1 | Demonstrate the concept of fluid mechanics like statics, kinematics and dynamics, including concepts of mass, momentum and energy conservation equation.                         |
| CO2 | Apply the principles of high and low Reynolds number flows to fluid flow systems.  |
| CO3 | Review the concepts of boundary layer and flow in transition.  |
| CO4 | Apply the fundamentals of one dimensional isentropic flow to variable area duct and principles of compressible flow to constant area duct subjected to friction or heat transfer |

## SYLLABUS

|  |            |
|--|------------|
| UNIT:1   | [13 Hours] |
| WELDING ARC: Definition of Arc, Structure and characteristics, Arc efficiency, arc blow, Electrical Characteristics of arc, Types of Welding Arcs, mechanism of arc initiation and maintenance, role of electrode polarity on arc behavior and arc stability, analysis of the arc. Arc length regulation in mechanized welding processes.  |            |
| WELDING METALLURGY: Introduction, Weld Metal Zone, Theory of solidification of metals and alloys, Homogeneous Nucleation, Heterogeneous Nucleation, Freezing of alloys, Epitaxial Solidification; Effect of Welding speed on Grain structure, Fusion boundary zone, Heat affected zone, Under bead zone, Grain Refined Zone, Partial transformed zone, Properties of HAZ.  |            |
| UNIT:2   | [10 Hours] |
| WELDING POWER SOURCES:<br>Requirement of an Arc welding power sources, basic characteristics of power sources for various arc welding processes, duty cycles, Selection of a static Volt-Ampere characteristic for a welding process, AC/DC welding power source, DC rectifiers, thyristor controlled rectifiers, transistorized units, inverter systems, Mathematical Problems on Static volt ampere characteristics                  |            |
| UNIT:3   | [08 Hours] |
| COATED ELECTRODES: Electrode coatings, classification of coatings of electrodes for SMAW, SAW fluxes, role of flux ingredients and shielding gases, classification of solid and flux code wires. METAL TRANSFER & MELTING RATE: Mechanism and types of metal transfer, forces affecting metal transfer, modes of metal transfer, metal transfer in various welding processes, effective of polarity on metal transfer and melting rate |            |
| UNIT:4   | [13 Hours] |
| SOLID STATE WELDING: Theory and mechanism of solid state welding. Techniques and scope of friction welding, diffusion welding, cold pressure welding and ultrasonic welding. High energy rate welding. Analysis of the Process.<br>WELDING TECHNIQUES: Technique, scope and application of the electron beam and laser welding processes. Under water welding-process & problem.   |            |
| Teaching Methods: Chalk& Board/ PPT/Video Lectures/Lecture by Industry Expert  |            |
| Text Books:<br>1. R.S.Parmar, "Welding processes & Technology", Khanna Publishers.<br>2.S.V. Nandkarni, "Modern Arc Welding Technology", Oxford & IDH publishing Co  |            |
| Ref. Books:<br>1. L.M.Gourd, "Principles of Welding Technology", ELBS/ Edward Arnold.<br>2. Richard L. Little, "Welding & Welding Technology", Mc-Graw Hill.<br>3.Rossi, "Welding Technology", Mc-Graw Hill  |            |

|--|---|---|---|---|---|----|
| BMEPE6042  | REFRIGERATION AND AIR CONDITIONING  | 3 | 0 | 0 | 3 | A  |
| Pre -Requisite: Basic of thermodynamics  |   |   |   |   |   |    |
| <b>Course Educational Objectives</b>   |   |   |   |   |   |    |
| CEO<br>1   | Explain how thermodynamic principles are applied within the refrigeration and Air conditioning, methods of lowering the temperature in single compression System.     |   |   |   |   |    |
| CEO<br>2   | Summarize about various system components and accessories of air-craft Refrigeration system, VCRS, VARS and different air-conditioning system.                        |   |   |   |   |    |
| CEO<br>3   | Apply knowledge of principles of producing low temperatures by using multi compressor, multi-evaporator systems and cascade systems.                                  |   |   |   |   |    |
| CEO<br>4   | Illustrate the different types and classification of refrigerant with its properties, To carry-out cooling load calculations for different applications.              |   |   |   |   |    |
| Course Outcomes: <i>Upon successful completion of this course, students should be able to:</i> |   |   |   |   |   |    |
| CO1  | Recall the basic principle of thermodynamics and understand various refrigeration systems like air refrigeration, vapor compression and absorption refrigeration etc. |   |   |   |   |    |

| UNIT:1 <span style="float: right;">[12 Hours]</span><br>Air Refrigeration System: Introduction, Unit of refrigeration, Coefficient of performance, Reversed Carnot Cycle, Temperature limitations, maximum COP, Bell Coleman air cycle, Simple Air Cycle System for Air-craft with problems.<br>Vapour Compression System: Analysis of theoretical vapour compression cycle, Representation of cycle on T - S and p - h diagram, Simple saturation cycle, sub-cooled cycle and super-heated cycle, Effect of suction and discharge pressure on performance, Actual vapour compression cycle. Problem illustration and solution   |  |          |      |   |   |   |   |   |   |    |    |    |      |   |
| UNIT:2 <span style="float: right;">[10 Hours]</span><br>Multi-stage compression and Multi-evaporator systems: Different arrangements of compressors and inter-cooling, Multistage compression with inter-cooling, Multi-evaporator system, Dual compression system. Simple problems  |  |          |      |   |   |   |   |   |   |    |    |    |      |   |
| UNIT:3 <span style="float: right;">[10 Hours]</span><br>Vapour Absorption System: Simple Ammonia - absorption system, Improved absorption system, Electrolux/Three fluid system, Lithium-bromide-water vapour absorption system, comparison of absorption system with vapour compression system. Simple Problems and solution. Thermoelectric Refrigeration, Magnetic Refrigeration.<br>Refrigerants: Classification of refrigerants and its designation- Halocarbon (compounds, Hydrocarbons, Inorganic compounds, Azeotropes, Properties of refrigerants, comparison of common refrigerants, uses of important refrigerants, Brines. Alternative refrigerants (Organic and inorganic compounds). |  |          |      |   |   |   |   |   |   |    |    |    |      |   |
| UNIT:4 <span style="float: right;">[13 Hours]</span><br>Psychrometrics: Properties of air-vapour mixture, Law of water vapour-air mixture, Enthalpy of moisture, Psychrometric chart, simple heating and cooling, Humidification, De-humidification, Mixture of air streams. Review question and discussions.  |  |          |      |   |   |   |   |   |   |    |    |    |      |   |

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A Grade and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

Requirements of comfort air conditioning: Oxygen supply, Heat removal, moisture removal, air motion, purity of air, Thermodynamics of human body, comfort and comfort chart.

Teaching Methods: Chalk& Board/ PPT/Video Lectures

Text Books:

1. Refrigeration and Air Conditioning by R.S. Khurmi.
2. Refrigeration and Air Conditioning by S.C. Arora and S. Domkundwar, Dhanpat Rai & Sons

Ref. Books:

1. Refrigeration and Air conditioning by P.L. Balloney, Khanna Publishers.
2. Refrigeration and Air conditioning by C.P. Arora, Tata McGraw Hill

| SUBJECT CODE | TITLE OF THE SUBJECT          | L | T | P | C | QP |
|--------------|-------------------------------|---|---|---|---|----|
| BMEPE6043    | QUALITY CONTROL & RELIABILITY | 3 | 0 | 0 | 3 | A  |

Pre -Requisite: basics of probability and statics

### Course Educational Objectives

|       |   |
|-------|---|
| CEO 1 | This course introduces students to concepts and methods of modern statistical quality control   |
| CEO 2 | Students learn to apply standard quality control tools. They learn the theoretical statistical concepts that justify the use of particular quality control tools in particular situations |

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
 Accredited by NAAC with a CGPA of 3.28/4 at A Grade and Accredited by NBA  
 Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

|       |   |
|-------|---|
| CEO 3 | They learn theory and methods for analyzing the performance of different quality control tools  |
| CEO 4 | The use of appropriate software for statistical and quality analysis is taught, and is necessary for successful completion of some homework assignments. Issues of ethics and professional responsibility and their relation to product quality are discussed |

**Course Outcomes: Upon successful completion of this course, students should be able to:**

|     |  |
|-----|--|
| CO1 | Understand the concepts of quality control, improvement and management.  |
| CO2 | Relevant with sampling by attributes, operating characteristics curves and ISO standard set attributes in sampling plans |
| CO3 | Apply quality engineering tools to the design of products and process controls   |
| CO4 | Recognize the need of reliability and carry out reliability data analysis  |

## CO-PO & PSO Mapping

## SYLLABUS

UNIT:1 [16 Hours]  
 Introduction, definition of quality, basic concept of quality, definition of SQC, benefits and limitation of SQC, Quality assurance, Quality control: Quality cost-Variation in process causes of variation –Theory of control chart- uses of control chart – Control chart for variables – X chart, R chart and  $\bar{x}$  chart -process capability – process capability studies and simple problems.  
 Control chart for attributes –control chart for nonconforming– p chart and np chart – control chart for nonconformities– C and U charts, State of control and process out of control identification in charts, pattern study.

| SUBJECT CODE  | TITLE OF THE SUBJECT  | L | T | P | C    | QP |
|---|---|---|---|---|------|----|
| BBSBS5061   | OPTIMIZATION IN ENGINEERING   | 3 | 0 | 0 | 3    | A  |
| Pre -Requisite: Basics of Mathematics, matrix, partial differential equation addition of linear equations |   |   |   |   |      |    |
| <b>Course Educational Objectives</b>  |   |   |   |   |      |    |
| CEO1  | To introduce the students how to use variables for formulating complex mathematical models in management science, industrial engineering and transportation science |   |   |   |      |    |
| CEO2  | To provide students with opportunity using various software package for solving liner programming and integer programming models                                    |   |   |   |      |    |
| CEO3  | To introduce the students to use of basic methodology for solution of linear programs and integer programs  |   |   |   |      |    |
| CEO4  | To introduce the students to advance methods for large scale transportation and assignment problems   |   |   |   |      |    |
| <b>Course Outcomes: Upon successful completion of this course, students should be able to:</b>            |   |   |   |   |      |    |
| CO1   | Analyze, formulate and solve linear programming problems using appropriate techniques.  |   |   |   |      |    |
| CO2   | Conduct and interpret post-optimal and sensitivity analysis and explain the primal-dual relationship  |   |   |   |      |    |
| CO3   | Develop mathematical skills to analyze and solve integer programming problem arising from a wide range of applications.   |   |   |   |      |    |
| CO4   | Communicate ideas, explain procedures and interpret results and solutions   |   |   |   |      |    |
| CO-PO & PSO Mapping   |   |   |   |   |      |    |

## SYLLABUS

UNIT:1 [14 Hours]  
 Introduction Historical overview of operations research, fundamentals of OR Modeling Approach. Linear Programming: Basic assumptions, formulation, graphical method, simplex method, Big-M method, duality theory, primal-dual relationships, sensitivity analysis.

UNIT:2 [14 Hours]  
 Transportation and Assignment Problems Specific features of transportation problem, streamlined simplex method for solving transportation problems, special features of assignment problems, Hungarian method for solving assignment problems. Integer programming: Special features, binary integer programming models-branch-and-bound technique.

UNIT:3 [10 Hours]  
 Dynamic Programming Characteristics, principle of optimality, solution procedure, deterministic problems. Concepts relating to queuing systems, basic elements of queuing model, role of Poisson & exponential distribution, concepts of birth and death process.

UNIT:4 [10 Hours]  
 Non-linear programming-Introduction to non-linear programming. Unconstrained optimization: Fibonacci and Golden Section Search method. Constrained optimization with equality constraint: Lagrange multiplier, Projected gradient method Constrained optimization with inequality constraint: Kuhn-Tucker condition, Quadratic programming Introduction to Genetic Algorithm.

Teaching Methods: Chalk& Board/PPT

Text Books:

1. Taha H.A., Operations Research 9th Edition, Prentice Hall of India, New Delhi, 2010
2. Kanti Swarup., Man Mohan., and Gupta, P.K., Introduction to Operations Research 7th Edition, Sultan Chand & Sons, New Delhi, 2005

Ref. Books:

## SYLLABUS

Unit – I [10Hrs]  
 Fundamentals of OB: Definition, scope and importance of OB, Relationship between OB and the individual, Evolution of OB, Theoretical framework (cognitive), behaviouristic and social cognitive), Limitations of OB.

Attitude: Importance of attitude in an organization, Right Attitude, Components of attitude, Relationship between behaviour and attitude, Developing Emotional intelligence at the workplace, Job attitude, Barriers to changing attitudes.

Personality and values: Definition and importance of Personality for performance, The Myers-Briggs Type Indicator and The Big Five personality model, Significant personality traits suitable to the workplace (personality and job – fit theory), Personality Tests and their practical applications.

Perception: Meaning and concept of perception, Factors influencing perception, Selective perception, Attribution theory, Perceptual process, Social perception (stereotyping and halo effect).

Motivation: Definition & Concept of Motive & Motivation, The Content Theories of Motivation (Maslow's Need Hierarchy & Herzberg's Two Factor model Theory), The Process Theories (Vroom's expectancy Theory & Porter Lawler model), Contemporary Theories – Equity Theory of Work Motivation.

Unit - II [7Hrs]  
 Foundations of Group Behaviour: The Meaning of Group & Group behaviour & Group Dynamics, Types of Groups, The Five – Stage Model of Group Development.

Managing Teams: Why Work Teams, Work Teams in Organization, Developing Work Teams, Team Effectiveness & Team Building.

Leadership: Concept of Leadership, Styles of Leadership, Trait Approach Contingency Leadership Approach, Contemporary leadership, Meaning and significance of contemporary leadership, Concept of transformations leadership, Contemporary theories of leadership, Success stories of today's Global and Indian leaders.

Unit – III [6 Hrs.]  
 Organizational Culture : Meaning & Definition of Organizational Culture, creating & Sustaining Organizational Culture, Types of Culture (Strong vs. Weak Culture, Soft Vs. Hard Culture & Formal vs. Informal Culture), Creating Positive Organizational Culture, Concept of Workplace Spirituality.

Unit – IV [8 Hrs.]  
 Organizational Change: Meaning, Definition & Nature of Organizational Change, Types of Organizational Change, Forces that acts as stimulants to change.

Implementing Organizational Change : How to overcome the Resistance to Change, Approaches to managing Organizational Change, Kurt Lewin's-Three step model,

## LIST OF EXPERIMENTS

List of Experiments:

1. Determination of Thermal conductivity of composite slab
2. Determination of heat transfer coefficient in natural or forced convection.
3. Determination of surface emissivity
4. Performance test on parallel flow and counter flow heat exchanger
5. Determination the efficiency and effectiveness of fins by natural convection.
6. Determination of Fin Efficiency and Effectiveness by forced convection.
7. Determination of Critical heat flux during boiling heat transfer.
8. Verification of Stefan Boltzman's law.

## LIST OF EXPERIMENTS

List of Experiments:

1. Design of thin/ thick cylindrical shells under internal fluid pressure
2. Design of lever
3. Design of Journal Bearing
4. Design of straight/ helical gears
5. Design of piston
6. Design of connecting rod
7. Design of crank shaft
8. Design of fly wheel

## LIST OF EXPERIMENTS

List of Experiment: (Minimum 8 Experiments)

(A) NUMERICAL COMPUTATION. (Minimum 05 problems)

(Using MATLAB or other software/language)

1. Basics of MATLAB or similar software/language
2. Finding solution by Numerical Methods (including graphics) for the following:
  - a. Bisection Method
  - b. Newton-Raphson Method
  - c. Secant Method
  - d. Gauss Elimination Method
  - e. Initial-Value Problems (e.g. Runge-Kutta Method)
  - f. Boundary Value Problem (eg. Shooting Method)
  - g. Eigen Value Problem

(B) SOLIDS MODELING ( 5 Models)

(Using Solid Modelling software eg. AUTOCAD/ProE/CATIA/SolidWorks/ UNIGRAPHICS etc.)

1. Learning the Basics of Solid Modelling Software
2. Modelling in 2D and image scanning.
3. Modelling in 3D of machine tool parts like gear details, machine tool beds, Tailstocks and assembly drawings of machine tools like lathe machine components, power drives, jigs & fixtures, power presses etc. Use of various types of surfaces in 3D modelling, animation features and other editing entities in machine tool assemblies.

| <b>BMEPC7010</b> | <b>INDUSTRIAL ENGINEERING</b> | <b>3</b> | <b>0</b> | <b>0</b> | <b>3</b> | <b>A</b> |

Pre -Requisite: Inventory control, Basics of Production Engineering

### Course Educational Objectives

|       |  |
|-------|--|
| CEO 1 | To educate basics of industrial engineering on the basis of productivity growth.                               |
| CEO 2 | To develop an idea of safe work system design and selection of appropriate method for a process.               |
| CEO 3 | To build up an entrepreneurial skill through the topics like layout design, forecasting and inventory control. |
| CEO 4 | To impart current advanced trends of different industries.   |

### Course Outcomes: Upon successful completion of this course, students should be able to:

|     |   |
|-----|---|
| CO1 | Outline the concept of industrial engineering and the factors affecting productivity of industries. |
| CO2 | Apply different techniques for better work system design.   |
| CO3 | Analyze the data collected from different sections of organization for planning and control.        |
| CO4 | Adapt the emerging trends of industrial engineering.  |

### CO-PO & PSO Mapping

### SYLLABUS

UNIT:1 [10 Hours]  
 Meaning, Definition, Objective, Need, Scope, Evolution and developments.

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A Grade and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

|  |            |
|--|------------|
| PRODUCTIVITY: Definition of productivity, individual enterprises, task of management<br>Productivity of materials, land, building, machine and power. Measurement of<br>productivity, factors affecting the productivity, productivity improvement programs.   |            |
| UNIT:2   | [14 Hours] |
| Time Study, Definition, time study equipment, selection of job, steps in time study.<br>Breaking jobs into elements, recording information. Rating & standard Rating,<br>standard performance, scale of rating, factors of affecting rate of working,<br>allowances and standard time determination. Predetermined motion time study<br>– Method time measurement (MTM), Measurement of wages and incentives.<br>Definition, objective and scope of work study. Human factors in work study. Work<br>study and management, work study and supervision, work study and worker.<br>WORK MEASUREMENT: Definition, objective and benefit of work measurement.<br>Work measurement techniques. Work sampling: need, confidence levels,<br>sample size determinations, random observation, conducting study.<br>ERGONOMICS: Introduction, areas of study under ergonomics, system approach to<br>ergonomics model, man-machine system. Components of man-machine system and<br>their functions – work capabilities of industrial worker, study of development of stress in<br>human body and their consequences. |            |
| UNIT:3   | [14 Hours] |
| PRODUCTION PLANNING AND INVENTORY CONTROL<br>Generalised model of a production system, Different kinds of production<br>systems, mass, batch job and cellular production<br>Layout: Optimisation in Product and Process layout; FMS; Manufacturing<br>Strategies<br>Demand forecasting: Moving Average and Exponential Smoothing methods,<br>Multiple regression method, Error in forecasting.<br>Inventory control: EOQ and EBQ, EOQ Sensitivity, Backordering, Determination of safety<br>stock, P and Q System, Joint cycle for multiple products   |            |
| UNIT:4   | [10 Hours] |
| CURRENT TRENDS: Introduction to Lean and Six Sigma, Just in time, Total quality<br>management, 5 pillars of TPM, Enterprise resource planning, Supply chain and logistics<br>management.(Definition)   |            |
| Teaching Methods: Chalk& Board/ PPT/Video Lectures/Lecture by Industry Expert  |            |
| Text Books:<br>1. Production and Operations Management by Everette E. Adam, Jr. Ronald J.<br>Ebert; Publisher: Prentice Hall of India<br>2. Production and Operations Management by Panneerselvam R; Publisher:<br>Prentice Hall of India  |            |

|--|--|---|---|---|---|----|
| BMEPE7021  | FINITE ELEMENT METHODS   | 3 | 0 | 0 | 3 | G  |
| Pre -Requisite: Basic Mathematics, Mechanics of solid  |  |   |   |   |   |    |
| <b>Course Educational Objectives</b>   |  |   |   |   |   |    |
| CEO 1  | To teach the basic principles, design and modeling considerations in using finite element Method.  |   |   |   |   |    |
| CEO 2  | Make the students to develop stiffness matrices for spring, truss, beam, plane stress problems and three dimensional problems.                       |   |   |   |   |    |
| CEO 3  | To teach the finite element method to solve structural, fluid flow and thermal problem.  |   |   |   |   |    |
| CEO 4  | To teach the basics of FEM to solve various engineering problems.  |   |   |   |   |    |
| <b>Course Outcomes: Upon successful completion of this course, students should be able to:</b> |  |   |   |   |   |    |
| CO1  | Explain the application and characteristics of FEM for the elements such as bars, beams, plane, isoperimetric elements, and 3-D element.             |   |   |   |   |    |
| CO2  | Apply the concepts behind variational methods and weighted residual methods in FEM   |   |   |   |   |    |
| CO3  | Analyze the element characteristic equation procedure and generation of global stiffness equation will be applied.                                   |   |   |   |   |    |
| CO4  | Select the finite element method to solve problems involving axisymmetric solids subjected to axisymmetric loadings, fluid flow and heat conduction. |   |   |   |   |    |
| CO-PO & PSO Mapping  |  |   |   |   |   |    |

## SYLLABUS

UNIT:1 [10 Hours]  
 Thermodynamic Analysis of I.C.Engine Cycles. Effect of design and operating parameters on Cycle efficiency. Modified fuel-air cycle considering heat losses and valve timing. Engine dynamics and torque analysis. Thermodynamic cycle with supercharging both S.I. and C.I. Engines. Limits of Supercharging. Methods of supercharging and Superchargers.

UNIT:2 [11 Hours]  
 Fuel of SI and CI engine, Fuel additives, properties, Gaseous fuel for SI and CI engine, LPG, CNG, Mixture requirement at different Load and speed. Principle of Carburetion, Carburetion of air-fuel ratio, Modern carburetor, Scavenging of two stroke engine.

UNIT:3 [12 Hours]  
 Functional Requirement of Fuel Injection system, Types of Injection, Electronic injection, MPFI, Different types of Nozzles, Injection timing, GDI system, TCI, CDI, firing order, Ignition timing, Spark advance mechanism, Stage of combustion in SI and CI engine, Method to control diesel Knock, Control of Detonation, Methods of measuring pollutants and control of engine emission.

UNIT:4 [12 Hours]  
 Variable compression ratio engine. Theoretical analysis, methods of obtaining variable compression ratio, Performance of Variable compression ratio Engine, Wankel rotary combustion engine, Stratified charged engine, Methods of charge stratification, Dual fuel and Multifuel engines, Variable Valve timing

| Avg.   | 1.5  | 1 |   |   | 1 |   |   |   |   |    |    |    |      | 1.25       |
| SYLLABUS   |  |   |   |   |   |   |   |   |   |    |    |    |      |            |
| UNIT:1 Introduction to NDT, Comparison between destructive and NDT, Importance of NDT, Scope of NDT, difficulties of NDT, future progress in NDT, economics aspects of NDT. Various physical characteristics of materials and their applications in NDT, Visual inspection – tools, applications and limitations -Fundamentals of visual testing: vision, lighting, material attributes, environmental factors.  |  |   |   |   |   |   |   |   |   |    |    |    |      | [6 Hours]  |
| UNIT:2 Liquid Penetrant Testing – Principles, types and properties of liquid penetrants, Developers, advantages and limitations of various methods, Testing Procedure, Interpretation of results. Magnetic Particle Testing- Theory of magnetism, inspection materials , Magnetization methods, Interpretation and evaluation of test indications, Principles and methods of demagnetization, Residual magnetism |  |   |   |   |   |   |   |   |   |    |    |    |      | [9 Hours]  |
| UNIT:3 Principles of MPI, basic physics of magnetism, permeability, flux density,  |  |   |   |   |   |   |   |   |   |    |    |    |      | [14 Hours] |

## GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

cohesive force, Magnetizing force, retivity, residual magnetism, Methods of magnetization, magnetization techniques, Interpretation of MPI, indications, advantage and limitation of MPI. Ultrasonic Testing-Principle, Transducers, transmission and pulse-echo method, straight beam and angle beam, instrumentation, data representation, A/Scan, B-scan, C-scan. Phased Array Ultrasound, Time of Flight Diffraction. Acoustic Emission Technique –Principle, AE parameters, Applications

UNIT:4 [11 Hours]

Principle, interaction of X-Ray with matter, imaging, film and film less techniques, types and use of filters and screens, geometric factors, Inverse square, law, characteristics of films – graininess, density, speed, contrast, characteristic curves, Penetra meters, Exposure charts, Radiographic equivalence. Fluoroscopy- Xero-Radiography, Computed Radiography, Computed Tomography

Teaching Methods: Chalk& Board/ PPT/Video Lectures/Lecture by Industry Expert

## GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A Grade and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

Properties of materials relevant to friction and wear. Study of various parameters: Viscosity, flow of fluids, viscosity and its variation, absolute and kinematic viscosity, temperature variation, viscosity index, determination of viscosity, different viscometers used.

Hydrostatic lubrication: Hydrostatic step bearing, application to pivoted pad thrust bearing and other applications, hydrostatic lifts, hydrostatic squeeze films and its application to journal bearing

UNIT:2

(12 Hours)

Surfaces, Friction and Wear: Surfaces, Friction and Wear: Engineering surfaces - Surface characterization, Contact of engineering surfaces: Hertzian and nonhertzian contact, Contact pressure and deformation in non-conformal contacts. Causes of friction, Stick-slip friction behaviour and friction instability, sliding and rolling friction, frictional heating and temperature rise, Friction measurement techniques. Wear and wear types, Mechanisms of wear, Wear of metals and non-metals. Wear models - asperity contact, constant and variable wear rate, geometrical influence in wear models, wear damage. Wear in various mechanical components, wear measurement and controlling techniques.

UNIT:3

(8 Hours)

Lubrication: Hydrodynamic theory of lubrication: Various theories of lubrication, petroffs equation, Reynold's equation in two dimensions -Effects of side leakage - Reynolds equation in three dimensions, Friction in sliding bearing, hydrodynamic theory applied to journal bearing, minimum oil film thickness, oil whip and whirl anti -friction bearing

UNIT:4

(8 Hours)

Design of Tribological Elements: Tribological consideration in design, Mechanisms of tribological failures in machines, Design Hydrodynamic bearings, and Performance analysis of gears, seals, piston rings, machine tool slide ways, cams and follower. Surface Engineering for Wear and Corrosion resistance: Diffusion, coating, electro and electro-less plating, hot deep coating, metal spraying, cladded coating, crystallizing coating, selection of coating for wear and corrosion resistance, potential properties and parameters of coating

Teaching Methods: Chalk& Talk/ PPT/Video Lectures/Lecture by Industry Expert

Text Books

1. Fundamentals of Tribology, Basu, SenGupta and Ahuja/PHI
2. Tribology in Industry : Sushil Kumar Srivatsava, S. Chand &Co

Ref. Books

1. Tribology – B.C. Majumdar, Tata McGraw Hill Co Ltd

| UNIT:1 (12 Hours)<br>Heat exchanger types, constructional details, Nature of heat exchange, Parallel flow, Counter flow, Cross flow, Concentric tube, Shell and tube, Multiple shell and tube, Compact heat exchanger, Condenser, Evaporator, Regenerator, Recuperator . Overall heat transfer coefficient, Thermal resistance, Efficiency. Temperature Distribution and its implications |  |      |      |   |   |   |   |   |   |    |    |    |      |      |
| UNIT:2 (12 Hours)<br>LMTD, effectiveness, Overall Heat transfer coefficients, Fouling factor, Scaling factor, Correction factor, NTU method, Flow Distribution, Friction Factor, Pressure Loss, Pumping power, Orifice, Flow nozzle, Diffusers, Bends, Baffles, Effect of Channel Divergence, Manifolds.  |  |      |      |   |   |   |   |   |   |    |    |    |      |      |

## GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

|   |            |
|---|------------|
| UNIT:3  | (14 Hours) |
| Heat exchanger fabrication, Tubular versus flat plate, Tube to header joint, Finned surface, Design of Liquid to Liquid heat exchanger, Plate and Frame heat exchanger, Design of Gas to Gas heat exchanger, Tubular regenerators for gas turbine, Regenerator for mobile gas turbine, Recuperators for heat pipe, Design of Liquid to gas heat exchanger, Comparison of fin geometric, Design of fin matrices, Design of automotive radiators. |            |
| UNIT:4  | (10 Hours) |
| Stress in tubes, Headers sets and Pressure vessels: Differential Thermal Expansion, Thermal stresses, Shear stresses, Thermal sleeves, Vibration, Noise, types of failures. Design Aspects: Heat transfer and pressure loss flow configuration effect of baffles. Effect of deviations from ideality. Design of cooling towers. Types of cooling tower, Wind loads, Dry cooling tower.  |            |
| Teaching Methods: Chalk& Board/ PPT/Video Lectures/Guest Lectures by Industry Expert & Academia   |            |
| Text Books  |            |
| 1. Heat and Mass Transfer by P.K. Nag, TMH<br>2. A.P. Frass and M.N.Ozisik, Heat Exchanger Design', John Wiley & Sons Inc, 1965.  |            |

### UNIT:3

[12 Hours]

Tools to Characterize nanomaterials: X-Ray Diffraction (XRD), Scanning Electron Microscopy (SEM), Transmission Electron Microscopy (TEM), Scanning Tunneling Microscope (STM), Field Ion Microscope (FEM). Surface Analysis techniques- AFM, SPM, STM, SNOM, ESCA, SIMS-Nanoindentation.

### UNIT:4

[12 Hours]

Applications of Nanomaterials: Information storage- nanocomputer, molecular switch, super chip, Nano-electronics, Micro- and Nano-electro-mechanical systems (MEMS/NEMS), Nanosensors, Nanocatalysts, Food and Agricultural Industry, Cosmetic and Consumer Goods, Structure and Engineering, Automotive Industry, Water- Treatment and the environment, Textiles, Paints, Energy, Defence and Space Applications, Photostat, printing, solar cell, battery.

Teaching Methods: Chalk& Talk, Ppt ,video lecture.

### Text Books:

1. Nano: The Essentials by T.Pradeep, Mc Graw- Hill Education.
2. A.S. Edelstein and R.C. Cammearata, eds., "Nanomaterials: Synthesis, Properties and Applications", Institute of Physics Publishing, Bristol and Philadelphia, 1996.

### Ref. Books:

1. N John Dinardo, "Nanoscale charecterisation of surfaces & Interfaces", 2nd edition, Weinheim Cambridge, Wiley-VCH, 2000
2. Akhlesh Lakhtakia (Editor), "The Hand Book of Nano Technology, Nanometer Structure, Theory, Modeling and Simulations". Prentice-Hall of India (P) Ltd, New Delhi, 2007.
3. Transport in Nano structures- David Ferry, Cambridge University press 2000.

| <b>LIST OF EXPERIMENTS</b>   |   |   |   |      |     |   |   |   |   |    |    |    |          |          |          |          |    |
| List of Experiment: (Minimum 8 Experiments)  |   |   |   |      |     |   |   |   |   |    |    |    |          |          |          |          |    |
| 1. Calibration of LVDT using indicator / CRO   |   |   |   |      |     |   |   |   |   |    |    |    |          |          |          |          |    |
| 2. Calibration of load cell using electrical resistance strain gauge   |   |   |   |      |     |   |   |   |   |    |    |    |          |          |          |          |    |
| 3. Calibration of thermo couples   |   |   |   |      |     |   |   |   |   |    |    |    |          |          |          |          |    |
| 4. Experiment on Pneumatic trainer   |   |   |   |      |     |   |   |   |   |    |    |    |          |          |          |          |    |
| 5. Experiment on Hydraulic trainer   |   |   |   |      |     |   |   |   |   |    |    |    |          |          |          |          |    |
| 6. Do Work Sampling of any work situation and determine how much time is spent in value addition, inspection /checking, communication and idleness.  |   |   |   |      |     |   |   |   |   |    |    |    |          |          |          |          |    |
| 7. Collect layout of any industry/ institute and design layout of similar industry/ institute to be constructed on a different site.   |   |   |   |      |     |   |   |   |   |    |    |    |          |          |          |          |    |
| 8. Select two or more possible locations for setting up of an industry/ institute and do comparative evaluation with respect to different parameters.  |   |   |   |      |     |   |   |   |   |    |    |    |          |          |          |          |    |
| 9. Gather sample data about stock of different items, their consumption pattern and price from any one of the following business firms such as Automobile Repair Shop, Medicine Store, Consumer Store, Production Shop, Service Centre etc and suggest stock that should be maintained for optimizing Inventory. |   |   |   |      |     |   |   |   |   |    |    |    |          |          |          |          |    |
| 10. Hands on practice on any Manufacturing Execution System (MES) software/ ERP suit such as NetSuite Manufacturing, IQMS MES Software, Fishbowl Manufacturing, JobBOSS, MES SIMATIC IT, etc.  |   |   |   |      |     |   |   |   |   |    |    |    |          |          |          |          |    |

## VIII SEMESTER [FOURTH YEAR]

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A Grade and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)

## SYLLABUS

### UNIT:1

[16 Hours]

Introduction: definitions and classifications; natural composites; role of matrix and reinforcement; factors which determine properties; the benefits of composites.

Reinforcements and the reinforcement matrix interface: natural fibers; synthetic organic fibers – aramid, polyethylene; and synthetic inorganic fibers – glass, alumina, boron, carbon, silicon based fibers; particulate and whisker reinforcements, reinforcement-matrix interface – wettability, interfacial bonding, and methods for measuring bond strength

### UNIT:2

[12 Hours]

Metal matrix composites: Introduction, important metallic matrices; metal matrix composite processing: solid state processing – diffusion bonding, powder metallurgy; liquid state processing – melt stirring, compocasting (rheocasting), squeeze casting, liquid infiltration under gas pressure; deposition – spray co-deposition and other deposition techniques like CVD and PVD; in situ processes. Interface reactions.

Properties of MMCs – physical properties; mechanical properties like elastic properties, room temperature strength and ductility, properties at elevated temperatures, fatigue resistance. Processing, structure of multi-filamentary superconductors, properties of aluminium reinforced with silicon carbide particles.

### UNIT:3

Hours]

[12

Ceramic matrix composites: Introduction; processing and structure of monolithic materials – technical ceramics, glass-ceramics. Processing of ceramics: conventional mixing and pressing – cold pressing and sintering, hot pressing, reaction bonding processes, techniques involving slurries, liquid state processing – matrix transfer moulding, liquid infiltration, sol-gel processing, vapour deposition techniques like CVD, CVI, liquid phase sintering, lanxide process and in situ processes. Processing, properties and applications of alumina matrix composites - SiC whisker reinforced, zirconia toughened alumina; Glass-ceramic matrix composites; Carbon-carbon composites - porous carbon-

### UNIT:4

Hours]

[10

Polymer matrix composites: Introduction; polymer matrices – thermosetting,

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

thermoplastic, rubbers. Processing of PMCs, Processing, properties and applications of fibre-reinforced epoxies, PEEK matrix composites, rubber matrix composites. Damping characteristics. Environmental effects in polymer matrix composites. Recycling of PMCs.  
 Micromechanics of unidirectional composites: micromechanics models for stiffness – longitudinal stiffness, transverse stiffness, shear modulus, poisson's ratio.

Teaching Methods: Chalk & Board

Text Books:

1. Composite Materials: Engineering and Science, by Matthews and Rawlings, CRC Press.
2. Composite Materials Science and Engineering, K.K.Chawla, Springer  
 An Introduction to composite material, by D.Hull and T.W. Clyne, Cambridge University press.
3. Metal Matrix Composites, Thermomechanical Behaviour by M.Taya, and R.J.Arsenault, Pergamon Press, Oxford.
4. Fundamentals of Metal Matrix Composites by S.Suresh, A.Martensen, and A.Needleman, Butterworth, Heinemann

| LIST OF EXPERIMENTS  |  |   |   |      |   |   |   |   |   |     |    |    |      |   |   |   |
| List of Experiment:  |  |   |   |      |   |   |   |   |   |     |    |    |      |   |   |   |
| 1. Determination of C.O. P on vapour compression system  |  |   |   |      |   |   |   |   |   |     |    |    |      |   |   |   |
| 2. Determination of C.O. P on vapour absorption system   |  |   |   |      |   |   |   |   |   |     |    |    |      |   |   |   |
| 3. Performance test on Air conditioning test rig (Window type)                                 |  |   |   |      |   |   |   |   |   |     |    |    |      |   |   |   |
| 4. Performance test on Air conditioning test rig (Duct type)                                   |  |   |   |      |   |   |   |   |   |     |    |    |      |   |   |   |
| 5. Determination of C.O.P of Ice plant.  |  |   |   |      |   |   |   |   |   |     |    |    |      |   |   |   |
| 6. Determination of C.O. P of Heat Pump.   |  |   |   |      |   |   |   |   |   |     |    |    |      |   |   |   |
| 7. Performance analysis in an experimental cooling tower.                                      |  |   |   |      |   |   |   |   |   |     |    |    |      |   |   |   |
| 8. Study on Thermoelectric refrigeration/ Magnetic refrigeration.                              |  |   |   |      |   |   |   |   |   |     |    |    |      |   |   |   |

# GIET MAIN CAMPUS AUTONOMOUS GUNUPUR-765022

Approved by AICTE, Govt. of Odisha and Affiliated to BPUT, Rourkela, Odisha  
Accredited by NAAC with a CGPA of 3.28/4 at A *Grade* and Accredited by NBA  
Dist. - Rayagada, Odisha, INDIA [www.giet.edu](http://www.giet.edu)
