Phase 2

- Identification of hybrids for disease tolerance and quality parameters
- Anther culture in selected hybrids for production of DH lines
- Screening for diseases
- Analysis and scoring for quality parameters
- Utilization of developed lines for hybrid development with improved disease tolerance and quality traits

6. Coordination

Each party shall appoint one qualified technical representative who will be responsible for planning the activities, monitoring progress of work, coordinating discussions, and ensuring fulfillment of all project requirements.

7. Responsibilities of GIET University

GIET University shall be responsible for:

- Conducting all laboratory-related activities from the initial stage up to seed harvest
- Monitoring day-to-day project activities through the designated responsible person
- Providing the required infrastructure, including laboratory facilities, instruments, and related equipment

All seeds produced under this project shall be supplied exclusively to Akshay Seeds Pvt. Ltd. (ASPL) and shall not be shared or distributed to any other party from this source.

8. Responsibilities of ASPL

ASPL shall be responsible for:

- Supplying seed materials as required from time to time
- Ensuring that the designated ASPL representative visits the laboratory at least once every three months, or more frequently if required for project review and coordination.

9. Meetings and Reporting

Project progress shall be reviewed through monthly review meetings.

A monthly progress report shall be prepared and circulated to both parties by the designated representative of GIET University.
